# **Egypt Assures**

Established 1887

# **U.S. and Israel Of Peace Policy**

### By David B. Ottaway

CAIRO — President-designate Hosni Mubarak of Egypt held his first meetings Friday with foreign leaders arriving bare for the funeral of President Anwar Sadat, and he assured U.S. and Israeli delegations that he intended to faithfully pursue the policy of his assassinated predeces-

Meanwhile, the police were reported to have re-established order in the city of Asyut 240 miles (384

kilometers) south of the capitol, after battling all day Thursday with armed bands of Islamie fundamentalists. Hospital and other local sources said 45 persons were killed in the fighting. Deputy Premier Fuad Mohied-din said that the situation there was "now under control " the in

was "now under control." He in-sisted there was no connection "at this stage" between the assassina-tion of President Sadat and the in-

surrection in Asyut. He said the government was tak-ing "severe measures" to prevent the reoccurrence of such incidents. He also said that a bomh explosion heard in the capitol last night had been a grenade that went off acci-

dentally in a police barracks. there were no other incidents reported elsewhere in the country. hut security was noticeably stepped up in the capitol as a multitude of official delegations began arriving for Saturday's funeral ceremonies

Mr. Mnbarak, 53, spent much of Friday in meetings with foreign dignataries. Chief among them was Prime Minister Menachem Begin of Israel and an American delegation consisting of the former presi-dents Richard M. Nixon, Gerald R. Ford and Jimmy Carter and led by Secretary of State Alexander M. Haig Jr.

M. Haig Jr. Mr. Mubarak talked for 40 min-ntes with Mr. Begin at his heavily guarded home in Heliopolis on the outskirts of Cairo, and Israeli sources said later the two leaders spent most of the time reassuring each other of their commitment to pursue the peace process and nor-malization of relations.

Hardly had Mr. Begin sat down inside the villa when he was heard to ask Mr. Mubarak, "How did it are preparing for attacking us, UPI quoted him as saving.] happen? A grim-faced Mr. Mubarak was

the same area. Because of the uncertainty, how ever, elements of the U.S. 6th Fleet ever, elements of the U.S. 6th Fleet in the Mediterranean and the Rap-id Deployment Force have been in "increased readiness." There are, two Marine amphibious units to-taling 4,000 men with the fleet, a Pentagon spokesman said.

Tensions were also high, offi-cials said, between Libya and Sudan. Libyan forces have continued to bomb villages along the Su-danese side of the Chad border to try to stop insurgents based in Su-dan from crossing into Chad, whose government is supported militarily by Libye.

### Sought U.S. Support

It was the Sudanese and Egyp-tian concern about a possible Li-byan invasion of Sudan that prompted Mr. Sadiat to send Vice President Hosni Mubarak to Washington last weekend to seek additional U.S. support. Egypt and Sudan are allies and both see the Libyan leader, Col. Monmer Quihafi, as their common enemy. The Sudanese announced Wednesday the formation of an anti-Qadhafi front, headed by a former high-ranking Libyan offi-cial, Mohammed Yosef Magaryef. U.S. officials said Thursday they

were surprised that the Sudanese disclosed the formation of the front at a time when they were most fearful of a Libyan attack But one official suid it was a way for President Gastar Nimeiri "10

casting incendiary appeals to the Egyptian Army and people to rise up and overthrow the government. Col. Qadhafi, who as long ago as 1977 called for the death of Mr. Sadai second overgraved in a long

Sadat, seemed overjoyed in a long speech he gave that his appeal had seemingly been heeded. "I told you on that day in 1977 — 1 September — that the one who committed the crime, the crime of the gave herturem the Li crime of the war between the Libyan and the Egyptian brothers, must be executed," the Libyan leader said in a broadcast to Egypt on Tuesday after the assassination. "Thus, the sentence has been car-

ried out."

No Evidence of Link

U.S. officials said they still U.S. officials said they still lacked any evidence to demon-strate that Libya was involved in the assassination. An official said that Secretary of State Alexander M. Haig Jr. "and everybody else in the State Department" has been looking for a Libyan tie, given the broadcasts from Tripoli, but so far there has been none discovered there has been none discovered.

In Khartoum, at a press confer-ence announcing the formation of the anti-Qadhafi front, Mr. Magaryef, Libya's former auditor-general who broke with Col. Qadhafi a year ago, said that seven military coups against the colonel had been attempted, the most recent in May, A U.S. official said that Wash-ington had "good information." that, in May, an attempt was made by Libyan air defense forces to

shoot down Col. Qadhafi's plane as it returned from a trip to Mos-cow, but that the plan failed. Mr. Haig was likely to confer with Gen. Nimeri in Cairo during the weekend when they both at-tend Mr. Sadat's funeral. The United States is pledged to help Sudan militarily and an effort is

under way to speed up delivery of items ordered by the Sudanese.

President Reagan reads a statement in honor of Egyptian President Anwar Sadat at the White House in the company of the three former presidents representing him on the U.S. delega-

tion at the Egyptian leader's funeral in Cairo. From left to right are: Gerald R. Ford, Richard M. Nixon, President Reagan's wife, Nancy, Mr. Reagan and Jimmy Carter. Story, Page 3.

# Israel Hopes to Speed U.S. Military Accord

### By Drew Middleton New York Times Service

\*×R

TEL AVIV - Israeli leaders hope that the assassination of President Anwar Sadat will impel the United States to speed agree-ment on the broad military cooperation that Israel has proposed. An Israeli government delega-

tion expects to go to Washington at the end of this month, and offi-cials say, it hopes to sign at that time a memorandum of understanding that would be the basis

for such cooperation. In talks in Washington at the beginning of last month, when Is-racti leaders argued against a Reagan administration proposal to sell AWACS planes to Saudi Ara-bia the United States and leader hia, the United States and Israel were said to have agreed that there was a need to strengthen their stra-tegic ties to counter what is seen as vict threat to the Middle East. **Extensive** Cooperation The Israeli proposals, which were put to President Reagan and Defense Secretary Caspar W. Weinberger by Prime Minister Menachem Begin and Defense Minister Ariel Sharon, were said to call for extensive cooperation in the deployment of U.S. land, sea

leaders, the United States would finance expanded production of the Israeli Merkava tank in exchange for the use in emergency of the tanks and other equipment for a full armored division that would be pre-positioned in Israel.

### Maintenance by Israel

Similarly, the deployment of 150 U.S. fighters in Israel, drawn from the Indian Ocean squadron of the Sixth Fleet in the Mediterranean, would provide the Israeli aerospace industry with the opportunity to maintain the aircraft and per-haps make modifications in their electronic systems.

Discussion of the proposals here pointed to two serious differences between Israeli and U.S. strategic thinking on Southwest Asia. As the Israelis interpret Washington's military approach, the strategy is designed to meet and defeat Soviet

ROME - Majed Abu Sharar. a

Mr. Abu Sharar was the spokes-

false anonymous telephone calls claiming responsibility for the al-

ing the basis for rapid U.S. reaction to Soviet moves.

For both military establishments, possible Soviet intervention in Iran is seen as the gravest dan-ger to the region's stability. As the Israelis understand it, 20 days would pass before the United States could make an effective military response to such intervention. Even then, some Israelis doubt that the United States would be

willing to react fully because of fears of starting a nuclear war. **Reaction Time Cut** 

But the U.S. reaction time could be cut, Israelis argued, if the Pen-tagon and the State Department take advantage of Israel's geographical position.

Present Pentagon planning, the sources said, estimates that it would take 17 days for an American force to reach the Saudi oilture.

in three days and Kuwait in 36 bours.

Senior Israeli officials estimate that, with ground and air resources positioned in Israel, Rapid Deployment Force units from the United States could be in Iran in 48 hours.

### Mildly Favorable Attitude

The U.S. attitude toward the Israeli proposals appears to be mild-ly favorable, although there is mili-tary resistance to stockpiling armor and other equipment in stationary positions on land. Current thinking favors deployment of such stores on fast merchant ships. The overall U.S. attitude was formed before President Sadat's death. Both Americans and Israelis believe that the two countries must do a great deal of rethinking on Middle East policy in the near fu-

### Deep Split in Schmidt Party

Rally 'for Peace' Points Up

By John Vinocur New York Tintes Service

BONN - One of the organizers uf a demonstration "Tor peace" that was take place here on Satur-day says the West must renounce all its plans to station Pershing-2 and Cruise missiles in Western Eurape,

Asked about the Soviet Union's SS-20 missiles targe ted on Western Europe, Volkmar Crede, the organizer, said they should not count as a factor in the coming U.S.-Soviet negotiations on deployment of middle-range nuclear missiles in Europe. They are only "modernized" versions of previously de-ployed missiles, he said, and there-fore not valid as a guid pro quo.

"Sharper and cleaner you can't get," an editorial Thursday in the Rheinische Post of Düsseldorf said of Mr. Deile's position. "Now all the participants knew what they're up to. The cat's out of the bag, and there's no talking around it. Whoever is demonstrating on Saturday has the U.S.A. in his sights."

But to Chancellor Helmut Schmidt, the demonstration is also what he called a 'declaration of war against the government." If the protest march against Scere-tury of State Alexander M. Haig Jr. in West Berlin 'tast month was an embarrassment for Mr. Schmidt, the demonstration on Saturday was to be vastly more painful and a clear indication of the deepening divisions in his Social Democratic Party.

Despite the charcellor's disapproval, about a quiarter of the Social Democrats in the parliament have signed statements backing the demonstration, which the organiz-ers expected to draw up to 200,000 participants. Its stated goals are to oppose atomic weapons in Europe, to persaude NATO members to withdraw their support for possi-ble deployment of the U.S. middlerange musciles and to encourage European governments to open disarmament negotiations "

### Nonviolence Urged

[Mr. Schmidt, in iss address Friday to parliament on the eve of the demonstration, urged nonviolence and called on the Soviet Union to slow its deployment of nuclear rockets in Europe, The Associated Press reported from Bonn.

["Let us preserve our internal peace, or else an will not remain in u position to secure external peace," Mr. Schmid: told Bundeslag deputies during a debate on the demonstration. He was carrving on a policy of peace, and "I will not let anyone: bargain the term 'peace pulicy' or the content

of that pulicy away f.rom me." [Mr. Schmidt said the Soviet Union could and dearmament efforth by halling "the installation of a new SS-20 every week." He said he planned to discuss deployment,

**Helmut Schmidt** 

of the SS-20 missiles with Soviet President Leonid 1. Brezhnev when the Soviet leader visits Bonn next The statements from Mr. Deile

about the goals of the organizers of the demonstration were made at a news conference at which he and others attempted to defend themselves against accusations that the demonstration was directed against NATO and the United States.

### 802 Organizations

month.]

The most biting charges have been made by Mr. Schmidt, who said: "Sadly, the desire for peace will be manipulated by many to serve particular political purposes. It may be that there are people who want to misuse the demonstration. It's very clear that the orgapizers did not want to cut themselves off from a bunch of support-

ing Communist groups." According to the organizers, 802 organizations, from church groups to the West German Communist Party and groups to its left, have announced support for the demonstration.

It comes at a time when the missile issue has become a focal point for neutralist, pacifist and anti-American currents in West Germany that have grown out of a de-cline in detente through events in Afghanistan and Poland. Many of

the groups supporting the demonstration have made clear that they think the Reagan administration and to some extent the policies of Mr. Schmidt are responsible for the situation.

The speakers at the rally are to include Erhard Eppler, a member of the Social Democratic Party's presidium and a former Cabinet minister under Mr. Schmidt. His presence, like the statements of (Continued on Page 2, Col. 4)

# Egypt Reportedly Consulted CIA On Plot Uncovered 3 Weeks Ago

By Robert C. Toth Los Angeles Times Service

WASHINGTON - Egyptian security forces uncovered an assassination plot against President Anwar Sadat at least two weeks before his murder and consulted with the CIA on how to handle it, American intelligence sources say. Two groups of conspirators were

arrested, and Egyptian officials be-lieved they had eliminated the danger, an assumption that obviously was not correct.

When the plot was first discovered, there were extensive discussions between the CIA and Mr. Sadat's security forces, the sources said Thursday. The Egyptians then arrested about 20 persons, includ-ing some in the military. Under questioning, these persons dis-closed information that led to the arrest of more than 50 others in late September.

But interrogation of the two killers who survived Tuesday's attack in Cairo shows they were di-rectly connected to the plotters ar-

### Potential Source of Plots

rested, a senior intelligence official

Mr. Sadat probably knew about the plot when it was uncovered and approved the way his security men handled it. He was relatively cavalier about his safety, but he reportedly was always aware of the army as a potential source of plots against him. As an army officer, he was part of the coup that toppled King Farouk.

Initial discovery of the plat against his life came aboot the time of the expansion from Egypt.

### **Protest Shows** Split in Bonn

(Continued from Page 1)

upport from the parliament members, is an illustration of the deep divisions in the party. The Social Democratic chair-

man, Willy Brandt, has followed a vague course in discussions about the demonstration, denying Mr. Schmidt full support while brushing close to saying he sympathizes with the marchers. His position has been that the party must attract young people who would oth-erwise join political groups outside the mainstream, ootably "the greens," whose original ecological concerns are being replaced by the anti-NATO positions of much of the peace movement.

### Schmidt Worries

But Mr. Schmidt believes that But most important, the diplothe party is losing its traditional mais emphasized, whatever they voters, and he cites as evidence the say about the future must remain severe defeats suffered by the Sospeculation because Mr. Mubarak has been too deeply in Mr. Sadat's cial Democrats in municipal elec-

Sept. 15 of the Soviet ambassador, six other Soviet diplomats and two Soviet journalists.

At that time, Mr. Sadat accused the Russians of trying to foment sectarian strife and violence with the aim of overthrowing his government. Since the assessination Tuesday, however, no evidence has been found to link the killers to the Russians, the Libyans or any other outside group, the U.S. sources

said Earlier last month, Mr. Sadat had cracked down on religious ex-tremists and political opposition figures, arresting 1,500 persons

over a four-day period, withdraw-ing recognition from the head of the Coptic Christian Church, dissolving 13 Moslem and Christian extremist groups, banning several religious publications and transferring journalists. It remains unclear whether this crackdown sparked the plot or whether it had been under way before.

What is known, the U.S. sources said, is that the CIA, which has been helping Mr. Sadat's personal security forces since 1974, was told about three weeks ago that a plot against the president by Moslem fanatics had been uncovered.

U.S. and Israel Assure Egypt **Of Support in Peace Process**

Mr. Arafat told journalists; "We agreed on all the busic issues," but he declined to comment directly on the question of arms, adding: "We should not forget also that Chinese comrades are always modest and we respect their position."

Earlier Friday, the Chinese news agency quoted Communist Party Earlier Friday, the Chinese news agency quoted Communist Party Deputy Chairman Deng Xiaoping as having told Mr. Arafat: "Our aid is limited. You have to rely mainly on your own efforts and on the unity of the Arab countries and peoples."

### Troops Subdue Street Riots in Venezuela City

Renders CARACAS - Venezuelan troops have taken control of the western city of Merida after two days of street nots, government officials said

Friday.

Triday. Troops were deployed after rioters threw stones at shops, government buildings and banks in the center of Merida, a city of 500,000 people about 700 kilometers (425 miles) west of Caracas. The riots started on Wednesday when a group of squatters resisted eviction from an apartment block. At least 200 people were arrested, the officials said. There were unconfirmed reports that 10 people had been wounded by gunfire.

### U.S. Says Russia Pushes Disinformation Drives

WASHINGTON - The Soviet Union has increased its efforts to win influence around the world with the use of so-called disinformation cam-

paigns and forged documents while playing down Marxist-Leminist phi-losophy, a U.S. State Department report claimed Friday. It said Soviet disinformation campaigns to undermine other nations had become more sophisticated and forgeries designed to mislead forhad become more sophisticated and lorgenes designed to instead tor-eign governments and public opinion were of better quality and were appearing more frequently. The charges were contained in a special re-port the State Department said was issued in response to requests for information from individuals, private groups and foreign governments.

The document listed alleged forgeries and foreign governments, paigns that it said were inspired by the Soviet Union and aimed mainly at the United States and its policies. The report included two case stud-ies of Soviet campaigns against deployment of the neutron warbead in Europe and plans to modernize Western Europe's auctear missile arsenal.

### U.S. Says Nicaragua Threatens Its Neighbors

The Associated Press

UNITED NATIONS, N.Y. - The United States charged Thursday that Nicaragua continues to "pump arms" into El Salvador and to build its own forces into a threat to its Central American neighbors.

Ambassador Kenneth Adelman, deputy U.S. representative to the United Nations General Assembly, denied Nicaraguan charges that a United Nations General Assembly, denied Nicaraguan charges that a joint U.S.-Honduran military exercise in the Caribhean was directed against the leftist regime in Nicaragua. Mr. Adelman's speech was a reply to allegations made Wednesday in the General Assembly by Humberto Ortega Savedra, head of the mling junta in Nicaragua. "Who, in fact, is being threatened?" Mr. Adelman asked. "Is it not

Nicaragua that has lent its territory for use as a base for the export of violence to neighboring countries? Is it oot Nicaragoa that continues to pump arms and other military support into El Salvador?"

### Karpov Wins 3d Game in Chess Tournament

MERANO, Italy --- The world chess champion, Anatoli Karpov of the Soviet Union, advanced halfway to retaining his title Friday as he beat Victor Korchnoi for the third time in their championship series. Mr. Korchnoi resigned on his 53d move, conceding the fourth game of

the series to the 30-year-old champion. Mr. Karpov won the first two games, and the best Mr. Korchnoi has been able to manage was a draw in the third game. The championship goes to the first player winning six games.

### 3 Blasts Cause Extensive Damage in N. Ireland Renters

BELFAST - Three bombs exploded in Northern Ireland on Friday causing extensive damage, but warnings were given in each case and no one was injured. Police blamed the Provisional Irish Republican Army for the attack.

The first bombing, explosives packed in a hijacked car, damaged a number of buildings in Armagh, 40 miles (65 kilometers) southwest of Belfast, Shorthy later a hijacked postal van full of explosives in beer kegs exploded behind a factory in Londonderry. The third bomb went off io Strabane, 15 miles (24 kilometers) from Londonderry, damaging civic offices there. Police said the guerrillas held security guards while the .

raises troubling questions about the huge U.S. strategic investment here and about the future of

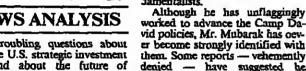

dozen years in the shadow of Anwar Sadat, faithfully and almost always silently carrying out policies decided by the president. "We have seen him a loi," said a Cairo businessman, "hut we don't know who he is or what he will

The questions are particularly important in a country where oneman rule is a long tradition; it is a radition that was followed with gusto by Mr. Sadat. The questions also seem unusually pertinent for Americans, since Washingtoo is backing Egypt with the largest economic aid program in the world and a \$3.5-billion military assistance package,

Mr. Mubarak has gone out of his way to reassure the United States, Israel and the rest of the world that Egyptian policies will continue oo the course set by Mr. Sadat in the Camp David agreements.

### Important Interview

Mr. Mubarak, in a symbolic gesture to underscore his commitment to the peace process, granted his first interview as president-designate to a Jerusalem newspaper, Ma'ariv, putting the Israeli request ahead of hundreds of others, both Egyptian and foreign. The assassination of Mr. Sadat appears to have originated, at least remotely, in a groundswell of Islamic extremism, whose main object of virulent opposition was Mr. Sadat's opening of Egypt to

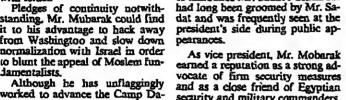

Egypt's relations with Israel. Mr. Mubarak has labored for a ba in the Negev.

Mr. Mubarak's chief foreign policy adviser is said to be Osama Baz, a high Foreign Ministry offi-cial who repeatedly urged Mr. Sadat to take tougher stands in deal-ings with Prime Minister Mena-

# **Reagan** Approves the Construction **Of New Radio Link to Submarines**

### By Richard Halloran

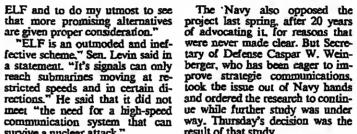

New York Tomes Service WASHINGTON - The Defense Department announced Thursday that President Reagan had approved the construction of an advanced communications system to transmit orders to nuclear-armed submarines at sea.

The new system, known as ELF for extremely low frequency, is part of the president's comprehensive program to revitalize the na-non's strategie deterrent even though the plan was disclosed sep-

arately from the president's pro-gram made public last Friday. Refurbishing the communica-tions network through which the president controls missiles, bombers and submarine launched missiles takes a high priority in the new plan, officials said, although most of the attention so far has been directed to the MX intercon-tinental missile and the B-1 long range bomber.

The program calls for the con-struction of a new transmitter with

a 56-mile antenna strung above ground near Sawyer Air Force Base in the upper peninsula of Michigan and for enlarging a sec-ond transmitter near Clam Lake. Wis. The 28-mile buried antenna. which is part of a research facility there, will be used as is. said The Defense Department

tary of Defense Caspar W. Weinberger, who has been eager to improve strategie communications, took the issue out of Navy hands and ordered the research to continue while further study was under

result of that study. Submarines armed with ballistic missiles patrol under the seas around the Soviet Union on constant alert, relying on silence and depth to escape detection. But they must come close to the surface to trail antenna to pick up messages

from Washington. The ELF communications apparatus, the Navy said, would allow the subs to operate deeper and faster without having to rise to the surface, thus risking detection, to receive messages. The ELF system transmits by

having a source of electric power drive a current through the long antenna and through the Earth before returning to the other end of the antenna. That current also penetrates sea water and carries the message to the submarine.

# **4 U.S. Presidents Discuss Mideast**

Washington Post Service

هیکذامن المجل

WASHINGTON - The men who have led the United States since 1969 - former Presidents Richard M. Nixon, Gerald R. Ford, Jummy Carter and President Reagan - met at the White House Thursday, brought together by the assassination of Egyptian Presi-dent Anwar Sadat, who had been a Middle East partner to all four.

The three former presidents ar-rived in a Marine helicopter on the South Lawn. Mr. Nixon, Mr. Ford and Mr. Carter had landed there before as president, but Thursday they were riding together and President Reagan was standing at the end of a red carpet with his wife to greet them.

The lawn was brightly lit by floodlights as Mr. Carter, his wife, Mr. Ford and Mr. Nixon descended the steps from the helicopter. Several bundred White House

staff members applauded as soon as Mr. Carter appeared, and the applause, mixed with whistling, grew louder as each former presi-dent appeared and waved.

### Serious Expressions

The Carters held hands as they walked with Mr. Ford and Mr. Nixon toward the waiting presi-dential couple. All of them had se-

deeply tanned. Mr. Reagan shook hands first with Mr. Nixon, who then kissed Nancy Reagan on the cheek. After the complete round of handshaking, the four presidents walked in-side the White House for a brief taik and cocktails in the Blue Room.

Never before in this century have four presidents gathered to-gether. During President Kenne-dy's administration, Hoover, Tru-man and Eisenhower were alive, and there were briefer periods in the presidencies of Lyndon B. Johnson and of Mr. Nixon when three of their predecessors were

Mr. Carter, Mr. Ford and Mr. Nixon were invited to the White House on short notice Thursday and came within an hour before they left for Cairo as part of the U.S. delegation to Mr. Sadat's funeral.

Mr. Carter returned to the White House for the first time since be turned it over to Mr. Reagan. Mr. Nixon was returning for only the second time since Aug. 9, 1974, when, as the only president driven from office by scandal, he took off by belicopter from the South Lawn to private

At Mr. Carter's invitation, Mr. Nixon had attended a state dinner honoring Chinese leader Deng Xiaoping. Mr. Ford visited Mr. Carter in the White House several times and had visited Mr. Reagan there once.

### White House officials said that the four presidents and Vice President Bush stood in a circle and discussed the Middle East and Mr. Sadat for most of their time together.

Page 3

When the group returned to the South Lawn. Mr. Reagan read a statement praising Mr. Sadat as "a man of peace in a time of vio-lence." He told those who "choose violence over brotherhood" that they had feared Mr. Sadat alive, "but in death you must fear him more, for the memory of this great and good man shall vanquish

Mr. Reagan thanked the former presidents for representing the United States at the funeral and ended with one of his favorite Irish expressions: "Until we meet again, may God hold you in the hollow of his hand."

The four reached the short flight of steps at the helicopter and entered the aircraft.

, The Reagans waved a last time, then retreated from the rotor's wash and walked back into the White House. The White House visit had lasted about 35 minutes.

**Bush Appearance Canceled** 

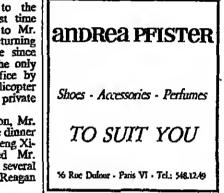

GLOUCESTER POINT, Va. (AP) --- Security concerns have prompted White House officials to cancel Vice President Bush's scheduled appearance here Oct. 18 for the Yorktown Bicentennial celebration, a Bicentennial official said Friday.

Mr. Reagan, aloog with Presi-dent Francois Mitterrand of France, is scheduled to speak during the end of the festivities in Yorktown Oct. 19. Bicentennial officials said that their appearances remain scheduled.

By William Borders New York Times Service DUBLIN — In an attempt to make the Irish Republic more ap-pealing to Northern Ireland's Protestants, the government here is considering steps to lessen the offi-cial status of the Roman Catholic

Church. "If I were a northern Protestant, I cannot see how I could be at-tracted to getting involved in a state which in itself is sectarian," Premier Garret FitzGetald said recentiv

Mr. FitzGerald has ordered a new study of possible changes in areas in which Catholic dogma has influenced the state — the constitutional ban on divorce, for exam-

"The fact is that our laws and our constitution, our practice, our attitudes reflect those of a majority ethos, and are not acceptable to Protestants in Northern Ireland," said the premier, a soft-spoken in-tellectual elected last June.

As part of the same effort at reconciliation, he proposed the repeal of the section of the constitution that claims sovereignty over the whole island of Ireland. The reason is not any lack of enthusiasm about reunification, but rather y gi D<sup>al</sup>ia a conviction that the constitutional claim represents a threatening posture toward northerners, rather

than a welcoming one. Predictably, the buginning of what Mr. FitzGeraid has called a "crusade" against sectarianism has set off outrage among politicians, although the church has generally heen silent. Former Premier Charles Haughey, leader of the opposition in parliament, called the premier's remarks a "bysterical outburst," and added:

"I regard it as a serious under-mining of our national position -the equivalent of sabolage of our national policy of unity — to at-tack the constitution in the way that Dr. FitzGerald has done."

The population of the Irish Republic is 94 percent Catholic. If heavily Protestant Northern Ire-

### Australia Imprisons

### **Croatian Immigrant**

The Associated Press SYDNEY - An Australian judge on Friday sentenced a Croatian immigrant to foor years in prison for recruiting and training a secret army to invade Yugoslavia.

In passing sentence on Jure Marie, 47, the judge said, "Ethnic groups should be warned that Aus-Italia will not be seen as a base for hestile revolution against any land."

land became part of the country, however. Catholics would make up only 73 percent of the population. The influence of the Roman Catholic Church is everywhere, With a ban on the dissolution of marriage, the government has adopted an even stricter position

the victims were running with the flow of traffic. "Only a tiny fraction of all joggers are killed or injured; than that of the church, which grants annulments. Some Irish they represent an extremely small proportion of the more than \$,000 pedestrians killed and tens of thousands injured people who have married again with the blessing of the church are technically regarded as bigamists under Irish law and their children every year," said the report, which was based on newspaper are illegitimate. clippings and police reports.

Contraception is strictly limited. Playboy magazine cannot be sold here. The state-owned television and radio networks broadcast the Tremor in E. Germany Angelus, the Catholic devotion, Believed Due to Meteor very evening at 6. Mr. FitzGerald is both a

staunch republican and a devout Catholic. But he argued in a recent radio interview that the pervasive religious atmosphere here helps to keep the country divided, contrib-uting to what he called "a parti-tionist attitude." The British initially partitioned

the open-ended Richter scale early Oct. 2 from north of the city. Witthe country 60 years ago, the pre-mier said, but partition is now reinforced by Irish laws "imbued by the ethos of the majority." nesses said they saw a flash of light from East German territory north of Berlin.

**Visits** North

The premier, whose mother was a Protestant from Belfast, has frequently said that one of the major reasons for his decision to enter politics in the first place was a de-sire "to work for the resolution of the conflict between my father's

and my mother's peoples." Unlike most politicians on this side of the border, he is a frequent visitor to the north, where he has many relatives, and he professes to understand northern attitudes beiter than some of his rivals.

He says northerners would be less frightened of reunification "if we could create a state down here which they could accept, and they could find the civil and religious liberties in which they believe."

# The F-16 Export Puzzle

For some years Venezuela, a working democracy, a longtime good friend and a country whose oil lets it pay cash, has wanted to modernize its air force. Not that there was any particular new threat to tend to or new national ambition to serve. But the idea of being ready to defend one's oil fields is current. Venezuela has come to see itself as having regional responsibilities in an area of growing turbulence. Its eye fell on U.S. export models designed for Third World air forces that can use good planes but don't need the hottest planes in the U.S. inventory.

What happened then is that the Reagan administration came to power and enunciated a new arms transfer policy, one tending to shift the presumption of correctness from those opposed to a sale to those favoring one. At the same time, according to suggestions made in congressional hearings last July, the U.S. Air Force whispered sweet inducements into Venezuela's ear. Shortly thereafter, Venezuela put in for two dozen F-16s, world-class fighters that the United States and its NATO allies are putting into their own air forces as fast as they come off the line.

So, you might say, F-16s may be a little gaudy for a country in Venezuela's still generally calm military circumstances. But no

non-NATO country that has bought this plane (Israel) or been promised it (Pakistan) is likely to get into less trouble, or to be able to afford the half-billion-dollar cost more. If a reliable democratic friend like Venezuela cannot be entrusted with the F-16, who can? Anyway, the Nixon-Ford-Carter go-slow-on-hot-planes policy merely gave the West Europeans, and even the Soviets, entry to the Lat-in market. This time Venezuela was eyeing the French Mirage 50.

But, unfortunately, that's not all. The F-16 is a big step up from any plane currently in a Latin air force. It is the prestige plane, the one most calculated to expand local air force chests and to confer the aura of American favor. Its acquisition by one Latin air force will almost certainly whet the appetites of others, and may incline Cuba to try to match it. Having offered it now to Venezuela, the United States cannot so easily put off non-Latin petitioners, including Pakistan, South Korea and Taiwan, otherwise likely customers for more modest models.

The arithmetic of the Venezuelan sale is simple. The geometry is complex and tronblesome. It typifies the dilemma the Reagan arms policy is creating.

One can go only so far from home. One can leave behind poverty and limitations. One can become larger than one's fellows. One can, as Sadat did, leave behind the men with whom he went out on July 23, 1952, to topple the monarchy, cleanse their country, inherit the world. The world from which men come serves it own warrant

Along the way, in his fantasies he became another pharaoh, father of the Egyptian Family. It was, as

he came to say, "his country" and "his army" and "his parliament." In a land where the overwhelm-ing majority submits and comes to terms with remote, capricious authority, and where now and then a man with luck and guts goes out and reaches for it all, he was an-other lucky soldier.

Deep down, lucky soldiers know that there are athers out there with fantasies and ambitions, that dangers await them at every turn. They know that their power is in large measure a function of the weakness of others.

Luck

# A Statesman of Vision and Charm

W was Anwar Sadar's palatial retreat, 20 minutes outside of Cairo. The garden gate was guard-ed by a lone soldier. There was no one else in sight but a lanky figure in a dark blue smit, stretched out one, OK." on a lawn chair some 50 yards away, reading a book and sipping

iced tea. As I approached, the figure rose, stepped forward and introduced himself: "My name is Anwar Sadat." Apart from the brief appearsnce of a photographer, that was the extent of the ceremony. My first and lasting impression of the president of Egypt, then, was that he was an unpretentious man; my second and equally enduring impression, from what he had to say in a taped interview lasting more than an hour, was that here was a man with a vision that went far beyond the politician's abligatory protestations of a desire for peace. That was in February, 1975, when Henry Kissinger was in mid-shuttle, and a reconvening of the Geneva conference on Middle East peace was the commonly accepted goal, and the celebrated visit to usalem was beyond anybody's

wildest dreams. Everything that followed, of course, has confirmed those first impressions, making it all the more tragically ironie that Anwar Sadat should have died in the pomp and the intervening years, remember-ing him now as a charming, driven, larger-than-life genuine world statesman, is to be tempted to a quick conclusion: Sadat is irreplaceable; no successor can fill this void. The kaleidoscope has been This is not to lay claim to some special insight. But the glimpses of what was to come, at Sadat's Arab leaders had been doing in , given one more cruel turn, and the Middle East mosaic will never be hands, in the shaping and forming of a "peace process" culminating at Camp David, was in his message the sam and harder still to hope that some-

six years ago. Did he "foresee the day when Egypt and the Arab countries can really coexist with Israel and have free cultural and economic crchange?" Sadat was a visionary without illusions: "You are asking the impossible now." What he was pleading for, urgently, was fur "our generation to end this state of belligerency." The coming genera-tion would have to work out the

An Odd Alaskan Oil Glut

Most people know that a worldwide oil "glut" has provided a welcome pause in rising prices. But few know that a very different kind of glut is, paradoxically, increasing the cost of oil from Alaska's Prudhoe Bay. There is an easy legal remedy for the problem, but only vigorous lobbying by the White House can bring it about.

21

Alaskan oil moves south by pipeline to tankers at the warm-water port of Valdez. Originally it was assumed that the West Coast would consume all the Alaskan oil. Thus, in exchange for the right to charge world prices. the oil companies cheerfully accepted a law prohibiting export.

But, thanks largely to conservation, the supply of Alaskan oil far exceeds foreseeable West Coast needs. So a third of the oil -roughly 500,000 barrels a day — is shipped through the Panama Canal, then pumped through another pipeline to the East and Midwest. This circuitous route adds about \$5 to the cost of each barrel, a burden shared by consumers, oil companies and Alaska,

The obvious solution is to end the export ban and allow Alaskan crude to be sold to Japan, at a transport saving of about \$4 a barrel. The oil sold to Japan would have to be replaced with oil bought, at lower cost, from Mexico and Venezuela. But the change

would halve the U.S. bilateral trade deficit with Japan, save hundreds of millions in annual shipping charges, and create new incentives to develop inaccessible Arctic oil reserves.

Why wasn't the ban lifted years ago? Not because of any logical argument. A few congressmen oppose any change that would benefit oil companies. Others oppose any measure that appears to increase American dependence on foreign energy. Yet the exports to Japan would not increase dependence on imports in any practical way.

The real problem is that it takes dozens of tankers to move the oil from Valdez to the Gulf Coast, and the protectionist Jones Act requires that they all be American. So U.S. shipping companies and their influential unions have a big stake in this wasteful traffic. Only a strong effort by the White House could beat them.

Will President Reagan take up a challenge from which President Carter recoiled? The fate of the economy and the Reagan presidency do not turn on whether Americans pay a few more cents at the pump. But while millions are being asked to sacrifice for the sake of economic efficiency, it is unjust and demoralizing to spare yet another special interest. THE NEW YORK TIMES.

THE WASHINGTON POST.

# A New Spirit in France

There were machines for "decollation" well before a doctor named Joseph Ignace Guillotin put his hand to redesigning them, but none that approaced his in speed, efficiency and, comparatively speaking, painlessness. The guillotine was modern in another way as well: It made decapitation, once reserved for noble criminals, available to the masses. A highwayman was, in fact, the first to partake of this new privilege, in 1792, but he was soon joined by a king and a queen.

It was during the French Revolution that the machine got its greatest workout, but it was a 19th century English writer who gave it its greatest publicity. The "crashing machine that constantly whirrs up and falls" in "A Tale of Two Cities" has been the stuff of many movies. many wax museums and countless nightmares.

Actually there was more than one machine. Until Napoleon saved money by making Paris the execution capital of France,

Time to Proceed in Ulster

ing violence that is difficult to stop.

have been called off.

each province had its own and an executioner who took his name from his place of residence -- Monsieur de Rennes, for instance, and Monsieur d'Alger. The job was usually hereditary and hedged with protocol; Executioners often wore top hats and a scarlet flower, and called their victims, as they would an intimate, "thou,"

For a long time, however, there had been only one executioner in France, and he has now lost his job with the abolition of the death penalty.

"It becomes easy for the condemmed man," wrote Colette during the trial of the French lady-killer. Landru, "to.put on, if only for a moment, that greatness of spirit which is so lacking in our judges and our penalties." In finally dismantling the guillotine, France, like all countires that abolish the death penalty, has put on that greatness of spirit.

terate memory. They can, as Anwar Sadat did, try to reconstruct history - their own and the history of great deeds. They can politically devour and marginalize men who knew them "back then" --- when they were merely mortals. They can gloss over, as he did in his biography, a less-glamorous

# **Till Yet Another Bullet Burst a Grand Dream**

### WASHINGTON - So much of our life, so much of our history, has been shaped by the bullet and the gun that it almost makes a mockery of humanity's persistent efforts to deal sensibly with the problems of this world. The assassination of Anwar Sadat is another cruel reminder of the heedlessness with which violence discards the dreams and plans of governments, leaders and average ful act.

That hard lesson was first borne home to me on Dealey Plaza in Dallas almost 18 years ago. The as-sassination of John F. Kennedy was the most fateful crime of the decade, nnt because he was more important or more preplaceable than the other victims whn followed, but because so much more

than a man was killed that day. That was the day that a whole generation of Americans lost its innocence. Many of those people have been impelled," by forces have been impelled," by forces ing a pre-Kennedy generation in more powerful than reason, to American politics. I do not know

-Letters-

### **Israel After Sadat**

It is of paramount importance for Israel and for the whole world that the tragic death of President Anwar Sadai of Egypt serve the forces of peace he so deeply cher-ished, and not those of beligerence. The duty of Israel and other uations in the region should be to face all aspects of the Falestinian problem. Clearly, a lasting peace in the Middle East can never be achieved as long as a just solution to the Palestinian situation is not found. Now more than ever is the time for self-restraint, reconciliation and mature wisdom. HARRY SPIRO.

Tel Aviv.

### Some Other Problems

As a subscriber in your Hong Kong edition, I should like to sec-ond D.G. Littman's appeal (Letters, Oct. 1) for a reduction of "hot sir" editorials and particularly commentaries on the Middle East question. Very little therein is based nn recent or past fact.

The tiring clické that the Palestinian problem is the only or the major one preventing peace in that area is a good example. Let us, for the sake of illustration, make the

search for a cause commensurate who the nominees would have in scale with the loss they felt. All of the bizarre conspiracy theories, including the one that led to last week's grisly disturbance of the remains of Lee Harvey Oswald, re-flect an unsatisfied hunger for some way to rationalize the dread-

Even nnw, they find it hard to accept that a man like Oswald could have ended the hopes that were embodied in John Kennedy. He had brought a new spirit and a new generation to American pub-lic life, and his assassination al-

tered the political cycles of America in a fundamental way. I have always felt that had Kennedy lived and won a second term against Barry Goldwater in 1954, as I think be would have, then neither party would have come back in 1968 with candidates represent-

with Kennedy leaving the

logic may seem to Westerners, to the Middle Eastern mind Egypt's very absence from that fighting contrasted suspiciously with Cairo's major involvement in a Deep down, Arabs say, they were less angered by his desperate daring in traveling to Jerusalem in 1977 than by his apparent unwillmuch less serious civil war in Lebanon in 1958.

Syrian President Hafez al-Assad Synan President Hafez al-Assad feit twice betrayed by Sadat. Start-ing in 1975, Sadat had left him in the lunch by negotiating directly with Israel despite promises to work in tandem made prior to their successful partnership in the 1977 The assassination of Sen. Robert F. Kennedy, later in 1968, had other kinds of costs. He was a mar-1973 war. Then, at the end of the velously engaging man, always changing and growing. No nne can know what kind of president he might have been. What we do know is that his absence changed Lebanese civil war in 1976, their respective foreign ministers swore to uphold the "unity of unities," only to have Sadat set forth on his fateful voyage to Jerusalem the the character of the 1968 conven-tion and the subsequent history of the Democratic Party. I have alnext year.

Adding to this negative image, almost the exact reverse of the one that he had projected to Western-ers suddenly paying attention to the Arab side of the Middle East equation, was the manifest con-tempt he showed toward his Arab critics and his increasing irritation with anything approaching criti-cism. That telltale mark of Arab dictators in trouble long escaped his Western admirers, despite per-iodic arrests of jnurnalists and opposition politicians starting as long ago as 1978. Only last month, when he arrested more than 1,500 opposition figures, did the West seem to realize what Arabs long had been saying: that Sadat faced growing opposition.

Yet the demonstrations celebrating Sadat's passing were something less than totally enthusiastic. When Sadat's predecessor, Gamai Abdel Nasser, died of natural causes, Beirut Moslems burned tires and mourned his passing in ways strangely similar to their cele-bration of Sadat's death as they fired their Soviet-manufactured AK-47 rifles into the air for days and days. That was in 1970, before the Arab world started comine apart at the seams, before Sadat elped the process along as no Arab before him, in the view of many Arabs.

**Iran's Fiery New Cleric President** Is a Longtime Khomeini Follower

By Robert D. McFadden New York Times Service

d chu:

NEW YORK - Each Friday for more than a year, a slim, intense Islamic clergyman delivered a fiery sermon before large crowds at Tehran University or one of the major mosques in Iran's capital.

Nearly always, he spoke with a rifle io his hand, jabbing its muzzle into the air to make his points as he castigated "the Great Satan, America," the leaders of Iraq and the political foes of Ayatollah Ruhollan Khomeini.

The orator-clergyman-politicianmilitani, Hojatoleslam Ali Khamenei, whose election as president of Iran was announced this week, is the archetype of the hard-line mullahs who have come to dominate the Islamic Republic's government, its judiciary and par-liament.

### Insugurated Friday

[Mr. Khamenei was inaugurated as president Friday at the Tehran residence of Ayatollah Khomeini in a ceremony attended by Iranian religious leaders. The Associated Press reported from Beirut. In remarks at the ceremony,

Ayatoliah Khomeini urged the Egyptian people to revolt and pro-claim an Islamic republic now that President Anwar Sadat is dead, according to Tehran radio. He told the Egyptians to defy the state of emergency proclaimed by the "dead pharaoh's successors" and "surge into the streets to throw out the leftovers of America," the broadcast said.

["The people of Egypt should not be afraid of martial law or the-state of emergency," Ayatollah Khomeini was quoted as saying. "They should ignore it. They **k**ealer

should do like the Iranians when they defied martial law and surged Last year, he succeeded Ayatol-lah Hussein Ali Montazeri as Friinto the streets to defend Islam." Egypt's president-designate, Hosni Muharak, proclaimed a one-year state of emergency following Mr. Sadat's assassination Tuesday.]

### Former Prisoner

A former political prisoner of the shah and the target of an assassination attempt last summer, Mr. Khamenei does not carry his rifle as a mere prop. He could again he a target of opposition violence and is likely to continue the crackdown that has led to the execution of more than 1,000 political oppo-nents in the last three months.

At 42, he is the first clergyman to hold the presidency since the revolution of February, 1979, and appears destined to be one of the most powerful figures in Iran's fu-

One of the original band of young theology students in the holy city of Qom who first rallied to Ayatollah Khomeini's call for religioos revolution, Mr. Khamenei has continued to be a loyal confidant of the 81-year-old revolutionary leader and has held many high posts since the end of Shah Mohammed Reza Pahlavi's role.

### **Council Member**

ture

He has been a member of the Revolutionary Council that has governed Iran's 36 million people since the monarchy was toppled, and he has been Ayatollah Khomeini's personal representative on the Supreme Defense Council, which oversees the conduct of Iran's war with Iraq. He also has been the ayatollah's spokesman and liaison with the government.

day prayer leader in Tehran, a major post - in effect, spiritual leader of the capital - because the major issues of the day are discussed at the prayer meetings. Since Sept. 1, he also has been secretary-general, or leader, of the ruling Islamic Republican Party, which he helped found.

### Predecessors Killed

Both his predecessors as party leader - Mohammed Javad Bahooar and Ayatollah Mohammed Beheshti, the party founder were killed by bombs, as was his predecessor as president, Mohammed Ali Rajai. All were victims of attacks that have claimed the lives of more than 100 clergymen. Mr. Khamenei was himself ocar-

ly killed June 27 when a bomb hid-den in a tape recorder exploded in front of him as he spoke at a mosque near the Tehran bazaar. His right arm was severely injured, and he still keeps it tucked in his clerical robes. His vocal cords were also damaged, making his deep, resonant voice even more busky. A man of sharp features and se-

vere mien that is oot softened by his black turban, thick spectacles or dark beard, Mr. Khamenei is known to acquaintances as Vajabi, which roughly translates as "Tom Thumb." He is married and the father of four children.

### Khomeini's Student

He began theological studies at age 18, and a year later he moved to Qom and began studies under Avatollah Khomeini, who would dramatically change his life. Like other students, he sat at the feet of masters, taking painstaking notes

... holding bayonet on lectures and arguing intricate and obscure points of the Koran.

Sand and

In 1963, as Ayatollah Khomeini's opposition to the monar-chy spread, Mr. Khamenei and other students joined protests, which saw policemen and soldiers storm the Feyziyah Seminary and kill students. A year later, when Ayatollah Khomeini went into exile, Mr. Khamenei returned to his hometown of Meshed.

After his release, he was sent into in a kind of internal exile in small towns. But he took part in street fighting when the revolution erupted and quickly rose to key positions.

Iran Has a 'Kind of Stability,' Foreign Minister Contends

### By Bernard D. Nossiter New York Times Service

NEW YORK - Despite waves of assassinations and executions, Iran's revolution has achieved a "kind of stability," according to the country's foreign minister. The revolution enjoys "the mass support of the people" and "has been changing their mentality, cal-ture and value systems," the minis-ter, Mir Hussein Monssavi, said. "Stability in the political system of our revolution has a different

meaning than in the West." . Mr. Moussavi, in New York for

**Gandhi Seeks** To Bolster Sec. 16 5 - Sec. ASEAN Ties She Calls for Work **Toward Shared Goals** The Associated Press MANILA - Prime Minister In-dira Gandhi of India called Friday on the Association of South East Asian Nations to set aside its diffcrences with India on the Indochina problem and instead work toward the shared goals of peace and economic development. Addressing a press conference on the second and last day of her state visit to the Philippines, Mrs. Gandhi said India's geographical closeness to Southeast Asia "impets us to have a dialogue with each country in ASEAN." "There is no problem that can-not be solved through negotiations and no issue that requires the use of arms," she said. Mrs. Gandhi spoke to reporters after meeting with President Ferdinand E. Marcos. She declined to able." Sources said the discussions included the Indochina problem. Relations between ASEAN — Indonesia, Malaysia, the Philip-pines, Singapore and Thailand and India source last year when New Delhi recognized the Viet-namese-installed Heag Samrin regime in Cambodia over ASEAN's objections. The non-Communist Southeast Asian bloc still recognizes the ousted Pol Pot regime.

### No New Orders

No new orders for ouclear reactors have been placed in oearly three years, and there are many who believe nuclear power has become a permanent victim of reduced demands for electricity and of soaring construction costs.

It was generally agreed that there would he no quick emerof the Nuclear Regulatory Com- gence of a commercial reprocess-

### Activation of South African Nuclear Plant Awaits U.S. Decision on Enriched Uranium

By Jack Foisie Los Angeles Times Service CAPE TOWN — The fale of

To remedy this, the president said he was taking several actions: outh Africa's first nuclear power station, a \$2.5-billion double-reac-tor installation under construction • Energy Secretary James B. Edwards was told to give high pri-ority to recommending ways to speed the regulatory and licensing near here, is in the hands of the Reagan administration, South Af-rican officials say. The officials said that activation

of the first reactor will have to be postponed unless the United States agrees to supply enriched uranium fuel under a contract that has been thrown into doubt.

The contract, signed in 1974, stipulated that the Department of Energy was to provide about 75 tons of enriched uranium to the South African Electricity Supply Commission, a semi-governmental agency. It called for the South Africans to provide the basic uranium, known as yellowcake, to an Oak Ridge, Tenn., enrichment facility. After some besitation, South

But since 1978, and passage of the Nuclear Nonproliferation Act by Congress, Washington has been reluctant to supply the enriched uranium. Also, South Africa bas refused to submit to International Atomic Energy Agency safeguards and to sign an international nonproliferation treaty,

### **Delivery Date Passed**

So far, the Reagan administra-tion has followed the position tak-en by the Carter government, and oo enriched uranium has been delivered. The initial delivery date

However, because President Reagan is regarded here as being more favorably disposed toward the South African government than President Jimmy Carter was, officials have expressed hope that the issue will be resolved in South Africa's favor. "We still have a little more

time," said Ronald Harris, construction site manager for the Electricity Supply Commission, which will operate the plant.

South African officials are in what is planned as a major indus Washingtoo discussing ways of meeting requirements of the Nu-clear Nonproliferation Act so that trial complex and housing area, has been under construction for five years. There has been some South Africa becomes eligible for concern expressed about the location of the plant, to be known as the Koeberg Power Station, be-cause of its proximity to densely the enriched uranium

### French Contractor

Officials here said the enriched uranium would have to be in France by next March at the latest. There it would be packed into rods for the nuclear furnace, then brought to South Africa for installation. A French company is the prime contractor for building the plant, which is modeled after pressured-water reactors in France.

**French Assembly** gin test operations next June and **Approves First** to be fully operational by the end of 1982. The second reactor is to Nationalization go into operation a year later. The plant, 20 miles from Cape The Associated Press

### "Common Interest"

While differences on the Cambodis question persist, "we have to search for what we have got in common." Mrs. Gandhi said. She added that "I think there is a common interest in peace and stability ... Let's find that area of cooperation and try to extend it."

Mrs. Gandhi's visit to the Philippines appeared to be part of a wider Indian effort to repair rela-tions with ASEAN. She visited Indonesia before attending the Commonwealth meeting in Melbourne, and Indian Foreign Minister P.V. Narasimha Rao asrived Friday in Kuala Lumpur, while an Indian trade delegation visited Bangkok carlier.

"Our relationship with ASEAN has improved and we want to im-prove it further." Mrs. Gandhi said.

On other topics, Mrs. Gandhi said India was "not happy" about U.S. arms supplies to Palostan be-cause such sophisticated weaponry imposed a heavy burden on India to match. "We feel we become a decade behind ... how can I face Parliament or our people and say we are far behind in our preparedness to meet any appression or confrontation?" she said. Mrs. Gandhi was asked whether

she thought the assastination of President Anwar Sadat of Egypt would affect peace in the Middle East. She replied that it is too carly to make any predictions. "My as-seasment is that it is not good for any leader or any people to feel somebody is being strongly sup-ported from outside. That weakens him in his country and in his rogion," the said.

# In Wodehouse's Never-Never Land

### by Jean Rafferty

ONDON - "There are only two kinds of Wodehouse readers," says the critic Richard Usborne, "those who adore him and those who have never read him."

Ranks of the second group are expected to diminish considerably starting Thursday, the beginning of centennial celebrations of P.G. Wodehouse (pronounced Woodhouse), the British-born humorist, creator of a timeless world of strong-minded girls and soupy ones, upper-class cads, twits and knights errant, pland uncles, dragon annts, eccentric peers and resourceful butlers — "a sort of musical come-dy without the music" in the author's words.

Wodehouse's most successful creations — Bertie Wooster, the ultimate innocent whose pure heart inevitably causes calamity, and Jecves, the gentleman's gentleman with never-fail solutions to all the young master's prob-lems — have been amusing millions since 917. Here, in Wodehouse's words, is their re-

lationship: "I turned to the Right Hon. I even went so far as to pat him on the back. It was like slapping n wet sponge. "'All is well,' I said. 'Jeeves is coming.'

"' What can he do?" "I frowned a trifle. The man's tone had been peevish, and I didn't like it.

That,' I replied with a touch of stiffness we cannot say until we see him in action. He may pursue one course, or he may pursue an-other. But on one thing you can rely with the utmost confidence — Jeeves will find a way. See, here he comes stealing through the under-growth, his face shining with the light of pure intelligence. There are no limits to Jerves' brain power. He virtually lives on fish."

Following on their heels in popularity would be the vague Lord Emsworth, whose passion for his prize pig, the Empress of Blandings, meant he was most likely to be found "hanging like a wet sock" over the side of her sty in the grounds of Blandings Castle, listening to her breathe. ("His IQ is about 30 points lower than a not too agile jellyfish," Wodehouse wrote of Lord Ensworth, "Capital chap,

though.") "Wherever and whenever the action takes place, his world is Edwardian England," noted a Wodehouse biographer, Herbert Warren Wind. The pace of that world is slow...a never-never land, so innocent, sum-drenched and quaint.'

In the world of Wodebouse, happy endings are guaranteed, even for the dreaded aunts. ("His aunt still affected him as of old. That is to say she made him feel as if he had omitted to shave and, in addition to that, had swallowed some drug which had caused him to swell unpleasantly, particularly about the hands and feet.") Bedroom scenes mean peo-

bottle. Relationships between the sexes are oo worse than chummy. ("Honoria Glossop was one of those large, strennous, dynamic girls with the physique of a middleweight catch-ascalch-can wrestler and a laugh resembling the sound of the Scottish Express going under a bridge. The effect she had on me was to make me slide inm a cellar and lie low till they blew the All Clear.")

There are oo messages in the way of the laughs. With sales of his books estimated between 20 and 30 million, Wodebouse is the most widely read humorist since Mark Twain. praised by such diverse talents as Rudyard Kipling, Agatha Christie, Ogden Nash and

Kipling, Agatha Christie, Ogden Nash and Terence Rattigan. So Wodehouse admirers will joyfully mark the centennial of the author's birth, an event he missed himself by only six years. His wid-ow, the 97-year-old Lady Wodehouse, plans to be in New York on Thursday night, when the Pierpont Morgan library will, if not exactly rock, certainly perk up to Edward Duke's one-man Wodehouse show. This will open a three-month exposition of Wodehouse memorabilia organized by a Morean trustee and Wodeorganized by a Morgan trustee and Wode-house fan, Jimmy Heineman. Among the rare books and etchings of the library's permanent collection will be about

500 objects associated with the author, from Solo objects associated with the aution, from his birth certificate through manuscripts, let-ters, photographs, sheet music, movie posters and scripts. The highlight of the show will be a specially commissioned oil portrait of the "Empress of Blandings" (fulfilling at long last Lord Emsworth's oft-frustrated wish) accompanied by a letter from the pig-loving Arch-bishop of Canterbury, Robert Runcie. Wodehouse is the first humorist to be honored by the Morgan Library since Gilbert and Sullivan. "It is official recognition of him as a mas-ter of the English language and a great stylist," says Heinen

Io England, Wodehouse's step-gran-daughter, Mrs. Simon Hornby, will unveil a plaque at his birthplace in Guildford, Surrey, and his old school, Dulwich College in south-east London, will open a P.G. Wodehouse Library on the school grounds. On Dec. 11, the students will offer their own tribute with a pro-duction of the musical "Jeeves" by Alan Ayckbourn and Andrew Lloyd Webber.

Pelham Grenville Wodehouse, known to his family and friends as "Plum" (Pelham said very quickly with an English accord, was born in Guildford on Oct. 15, 1881. He died Feb. 14, 1975, aged 93 in Remsenburg. Long Island, where he had made his fulltime home since 1959 with his wife of 61 years, the former Ethel Newton Rowley. Death came six weeks after he was knighted in Queen Elizabeth's New Year's Honors List, bringing a tardy, yet none-theless happy, end to more than 30 years' al-ieution from Britain.

swelt impleasantly, particularly about the hands and feet.") Bedroom scenes mean peo-ple hiding in cupboards or trapped atop them by starting Scotties; domestic drama involves searches for policemen's helmets or discus-comic novels, collections of short stories and sions of the best way to boobytrap a hot water | autobiography - and almost 1,000 articles, | Edward Cazalet who, as a boy, spent two or

P.G. Wodehouse, the creator of Bertie Wooster and Jeeves, among others.

collaborated on 18 plays and composed lyrics or book for 33 London and Broadway musicals with the likes of Jerome Kern, Ira Gershwin, Cole Porter and Oscar Hammerstein. His most-familiar lyrics were for the song "Bill" from "Show Boat." At one time he wrote under five pseudo-

At one time he wrote under nive pseudo-nyms for Vanity Fair to keep the magazine from looking like a one-man effort. His writ-ings were polished to a gleam that had Hilaire Belloc calling him, "the best writer of English now alive — the head of my profession" as carly as 1934.

His first book appeared in 1902, after h resigned as a trainee at London's Hong Kong and Shanghai Bank. Though a sociable man,

three weeks a year with him. "He started the morning by doing his 'daily dozen' exercises and was probably the only man in his 90s to still touch his toes. Then he would breakfast alone and work from 9 until 12."

Herald Tribune

Lunchtime brought the daily martini, then after lunch a long walk, then back to his desk for two to three more hours of writing. After dinner Wodehouse would settle down to read. "He was enormously well-read," says Cazalet. "He enjoyed mystery stories and loved Agatha Christie for her plots. They had a long corre-spoodence. And he was an expert on Shakespeare

Wodehouse adored writing. He wrote every day for 70 years, and when not actually engaged in the process was taking long walks to think about what he would write when he got

# La Pyramide: **A** Monument In Name Only

### by Patricia Wells

PEKE

Vienne, France — Several weeks ago, while dining at the newest Michelin three-star, La Mère Blanc in Vonnas, we decided in pay a visit to the oldest, La Pyramide in Vienne. This land-mark sertaurant of the law Evenand Point one mark restaurant of the late Fernand Point, one of the most inspired and inspiring chefs of the century, is just 20 miles south of Lyons, in a rambling, well-appointed home surrounded by giant urns of red geraniums and a garden af tall, pink roses. For the past half-century, this kitchen and dining room have set the tone and standard by which so many fine French meals are judged.

In recent years, La Pyramide has endured an endless barrage of criticism from diners, yet out of respect for the man who gave so much to contemporary dining, the restaurant has not been stripped of its stars. One does not come to La Pyramide demanding, or even anticipat-ing, invention, but in hopes of understanding the roots, seeing where the seeds of the present were planted so many years ago. One comes to understand who it was and that it was that inspired so many contempo-

what it was that inspired so many contempo-rary French chefs, especially such Point stu-dents as Paul Bocuse, Francois Bise, Jean Troisgros and Louis Outhier.

We approached the experience with positive anticipation, expecting a safe and solid meal, understanding that the restaurant itself has been intentionally retained as a living culinary inuseum by Point's indefatigable wife, Mado, now in her 30s.

All that one asks is that Point's main tenets be respected: The dominant flavors should be those of fresh and perfect ingredients. Every morning, Point said, the kitchen must begin again from zero, with oothing on the stove. He described success as "the sum of a lot of small things correctly done." We could not have been more disappointed

been more disappointed. The meal was neither fresh nor modern, the dining room carried the weight of fatigne, and there was not a hint of the genius of Point. Dining at La Pyramide today is like listening to an aging planist who has, quite unknowing-ly, practiced mistakes into his playing. Ma-dame Point still directs the show, and chef Guy Thivard has held court in the kitchen for nearly 20 years, but one senses that oo one in

charge really cares any more. Worst of all, if there is someone in charge who cares, he or she is not tasting what is put

consisted of a pathetic-looking pigeon, sweet-breads and tiny wild mnshrooms, all saturated with the taste of bleach? Yes, chlorine bleach. If someone was paying attention to the "small things." we would not have been presented with a fine-looking, fresh coulis of raspberries that was totally moldy and absolutely inedible.

Page 7W

For the sake of history, one can put up with cigarette holes in the tablecloths, slow and plodding service, even waiters who tell you, at 9 on a Friday evening, that you are much too late in order one of Point's much-copied speci-alties, poularde de Bresse truffée en vessie, or chieken cooked in pig's bladder. But what is one to think of sauces that taste of bleach and mold

A third disaster, not the fault of the restaurant, came earlier in the meal.

After the required ritualistic selection of the wines, from a list held at arm's length in front of you by sommelier Louis Thomasi, a 1975 Margaux, Château Cantenac-Brown, was selected. The bottle was uncorked, and set in a wieker cradle. By chance, the cork was exa-mined, and did not match up with the label on the bottle. The bottle was labeled 1975, the cork read 1976.

The sommelier was summoned, he registered alarm, sampled the wine and set off for the cave. Returning with another Cantenac-Brown labled 1975, he uncorked it, sampled the contents, and before examing the cork (which read 1975) concluded that the two wines were indeed not the same.

Thomasi, who has been with La Pyramide since 1929, said he had never before witnessed such a confusion. An uncommon happening, for sure. But a lesson for all.

After all of this, it came as little surprise to find that the famous Point dessert, the multilayered marjolaine chocolate cake, was oeither good nor great. The chocolate cream tasted like a combination of cream cheese and cocoa, the traditional seven layers had been reduced to five. Sadly, oow it is simply a poor imitation of the marjolaine served at the restaurant of one of Point's students, Francois Bise of L'Auberge du Père Bise in Talloires.

rant de la Pyramide, 38200 Vienne; tel: (74) 53.01.96, offers a 250-franc (\$45) memu prestige and a 220-franc menu du jour. A la carte, a dinner, without wine, will cost about 240 francs. Credit cards: American Express, Diners

# **Milan's Designers Discover the Leg**

### by Hebe Dorsey

ILAN - Miles of legs, color and Williams naids — Milar's spring collections were a joyful, triumphant hymn to summer, a

were a joyful, triumphant hymn to summer, a carefree pagan song. In a city that usually floats in chie beigey tones, the explosion of color (reinforced by the influential Giorgio Ar-mani) was a radical and striking change that brought everything into bright focus. The most vivid impression out of Milan is the talent impact, which gets stronger every season. Now, top Parisian designers such as Karl Lagerfeld and Claude Montana are also on the scene, with Montana designing the Complice collection while Lagerfeld is official-ly responsible for the Mario Valcatino shoes — but officiously for much more. -but officiously for much more. Those collections were a turning point in

that skirts and points, as you and I know them, are finished and leg watching is sure to be a favorite spectactor sport again. Shorts, bernu-das, culottes and cropped pants, already in the streets, took a oew, stronger dimension as each designer gave it his individual, highly polished finish. The excellence of Italian raw materials, including Fendi's snakeskins and Mario Valentino's flowered suedes, finished painting the hly.

the bly. Here and there, fashion became charming, storybook costumes. The parade was led by sailors, pirates and toy soldiers with a cross-current of Americana. In a Deep South atmos-phere, complete with soal music, Gone-With-the-Wind belles in big, aproned gowns mixed with Huckleberry Finns, all in typical vests and crossed names

and cropped pants. As usual Armani came out Numero Uno even though he toned down his delivery by not holding a fashion show. His is still the strongest Italian signature, for he has put across the image of a young modern yet elegant "Annani woman." You can tell an Annani just as you can tell a Saint Laurent and you see plenty of them in the streets these days.

In a breakthrough, Armani has gone for bright colors and looser shapes. Yet, the result — told in his own, personal and highly sensi-tive color and fabric mixes — is pure and perfect Armani. As he explained, he needed both the change and the challenge. "I thought it was time for me to experiment because people kept saying that Armani was good for tailored blazers and muted colors, period. So I had to show everybody that I was capable of doing something else. I think a stylist must not lock himself up, he must innovate. Even if you must keep your style, you must change.

Change or no change, Armani has struck a series of winners, the most obvious one being his new, softly tailored jacket with loose float-ing back, trompe-l'oeil vests and rolled-up shirtsleeves, these carried into evening.

The other big winner of those collections was Gianfranco Ferre. With emotion verging on hysteria, he came into his own with the most applanded collection all week, ending the season on a high oote. A designer who has been on the threshold of success for a couple of seasons, he is now way up there with the

stars — and it couldn't happen to a nicer guy. A former architect, Ferre brings a new, con-trolled and sophisticated couture dimension to

Fendi's Erich von Stroheim collar went on everything, including swimsuits.

Italian fashion. He also makes it all real for middle-aged women, for whom those kicky, shorts and bloomers can be a bit much. Against the backdrop of a gray steel battle-ship, with his swimsnits displayed as flags, he paraded his high-waisted sailor theme, first in crisp navy and white then in silver sequents. Gianni Versare's was also a hit collection as

his undeniable charm came across in chilfon, ruffled minis and shawls combined with Art Deco tops. Versace can be credited with Art Deco tops. Versace can be credited with doing the prettiest evening look in Milan — a rare commodity in a city where they tend to under-stand sportswear, and only sportswear. Nothing big and ballroomy, you understand, hut

Italian fashion. He also makes it all real for charming, mid-calf crepe de Chine dresses, their hips gathered as in a sarong and embroi-dered with primary-colored, Art Deco stripes and circles. His maillots, with short Art Deco silk wraps, are hot summer disco stuff.

Versace's other great merit is to have trans-lated somewhat casual, easy shapes such as sarongs, into something highly elegant, as if doing it all without trying. The most romantic of Italian designers, Versace has also signed the Genny collection, whose fluffy, layered white blouses are sure to win the heart (and the neckline) of the Princess of Wales, already a Versace fan.

At Fendi's, the story is that they are pushing leather and suede collections that are closely copied on the smashing fur ones, signed Lager-feld. But the Fendi sense of fun, from stiff starched collars to serve swimmers, ran all the way through a specially hult, 35-tableau laby-rinth, created by art director Nando Miglio.

Missoni has no prohlems as its wares are the very foundation of Italian fashion. Missoni's clothes are a way of life as well and its knits are on the shelves of fashion collectors. There is fresh talent in the family - all three chil-dren now help father Tai with textures and mother Rosita with styling. So the clothes have a younger ring, with plenty of those snappy shorts and culottes around.

Luciano Soprani and Laura Biagiotti are still junior names in the star-studded Italian sky but they are getting there too — and fast. Soprani, who designs his own collection plus the Basile one, is suffering a hit from last season's overexposure. In a way, the soft and romantic Basile collection came almost close to being better than the one under his own name. Biagiotti, whose commercial direction is get-ting stronger all the time with a new and cheaper, so-called Portrait line is on her favorite successful wavelength -- designing for herself and other women who appreciate the comfort of loose shapes and smooth-to-the-skin linens and cashmeres. Her cropped, widely striped, blue and white pajamas were reminiscent of Chanel's Deauville pants.

It is the year of the monkey for Krizia,

# Columbus, the Gem of the Ocean

### by Anne Sinclair Mehdevi

ELANITX, Majorea — At the approach of Columbus Day, celebrated in Spain and South America as well as in the United States on Monday, a number of Majorcans become restive. They have no objection to worldwide homage for Columbus, but feel that a bit more fanfare could be given to the fact that he was very possibly of Majorcan origin. One recent and well-documented theory insists he was actually born on this island in the small town of Felanitx.

According to most encyclopedias, Christo-pher Columbus — in Spanish Cristobal Colón — was born in Genos, the son of an Italian wool-comber and tavern-keeper named Domenico Columbo, This Columbo or Colombo was a rather litigious fellow and his name crops up in a number of notarized documents, one of which includes the name of his son Cristoforo.

Yet there is no record of this son's birth in Genoa; in fact there is no record of Columbus birth anywhere. The years most favored, 1446 and 1451, have been settled on by counting backward from various ambiguous statements Columbus made about himself. He wrote much autobiographical material, but in none of his papers does he explicitly say he was Gencese. After his death. Ferdinand, his son and biographer, went in Italy and found no trace of his father's family.

There is no scrap of paper, no letter, no re-corded comment by Columbus or his contemporaries to indicate that he ever spoke or wrote Italian. The letters to his younger brother, Bar-tholomew, his confident and often his secondn-command, were in fluent Spanish.

Cohmbus' apparent ignorance of Italian has cast doubts on the accepted theory that he grew up in and near Genoa. Furthermore, his extensive knowledge of Latin, mathematics, cartography and astronomy, and his notoriously haughty mamer cast even-greater doubts over his having come from the family of a textile worker-wineseller.

On the passport issued to him by King Ferdinand and Queen Isabella after they finally decided to sponsor his westward explorations, he is identified as "nobleman." They had en nobled him even before he set sail. He had demanded this as well as other presumptuous concessions: the hereditary title of "High Admiral of the Ocean Sea of the Indies and of terra firma;" the position of viceroy and governor of all territory he should discover; 10 percent of all trade carried on in this territory; and, to top it off, the privilege of wearing spurs of gold. These demands are scarcely consistent with the theory of his being a humble and unknown adventurer,

Columbus himself intentionally threw a smokestreen over his antecedents. Why he did this has never been satisfactorily explained and probably never will be; but the enigma has driven many a scholar to pore over legal pa-pers and archives in Genoa and Madrid. A number have followed a trail that led them back to Majorca.

The most eminent of these researchers is the famous historian-philosopher Salvador de Madariaga. In his book "Life of the Magnificent Senor Don Cristobal Coloo" Madariaga having done away with the humble-Italian the-ory — deduces a Majorcan or Catalan origin. (In those days these two were virtually undifferentiated as both provinces belonged to the (Town of Aragon.)

Christopher and his brother Bartholomew vere talented cartographers and mapmakers, and Majorca was the world center of that science. Prince Henry the Navigator had hired orcans as te ed in Portugal, with the aim of finding a sea route to the Orient around the tip of Africa. No wonder then, according to this theory, that

both brothers turned up in Lisbon when they were very young, Bartholomew in his early

teens. Then there is the family name. Madariaga asserts that it was not Columbo, but Colom. It is true that Colombus often signed himself Colóm, a name as common in Majorca as Jones is in Wales. (There are more than 160 Coloms in the Palma phone directory today.) Why was this changed in Castilian to Colon? Simple: The Castilian tongue, which prefers to pronounce the soft 'c' as a lisping 'th,' does not like the final 'm' after a vowel. The first resident of Eden, for instance, is Adán; and so Colom became Colon.

To explain the erudition of the Colom brothers Madariaga supposes them to be of Sephardic origin, regarded in those days as the anistocracy among Jews. During the half cen-tury before the Jews were finally expelled from Spain in 1492, persecution and discrimination were rife. The Coloms, Madariaga reasons, igrated to Genoa, Italianized their name to Colombo, and as refugees took up the first work they could find, in this case wool-working. Christopher himself, it is said, went in sea

at a very early age and even practiced piracy. However, the Madariaga theory goes on, the Sephardic devotion to learning was not al-lowed to lapse. Castilian was spoken at home and the children were taught Latin, mathematics and the Majorcan speciality, cartography. Far-fetched as this assumption may sound, it is bolstered by an event that astonished Spanish television viewers a few months ago. Shimon Peres, a Sephardic Jew who was a candidate for prime minister of Israel, gave an interview in which he spoke perfect, if archaic, Castilian. This had been taught from generation to gen-eration in his family since it was forced to leave Spain oearly 500 years ago.

This Sephardic theory accounts for Colum-bus' lack of Italian and for his erudition, but it does not explain how a poor, though very learned, seafarer managed to marry in 1487 just two years after he went to Portugal - one of the most blne-blooded young noblewomen of that country. He was tall, handsome and redhaired and he used to attend mass at the convent where his future bride was lodging, but in those days of insurmountable class barriers such advantages would hardly have been enough for him to obtain her parents' consent.

A third, and as yet unpublished, theory attempts in get around this snag. It was first proposed by the late Juan Cerda, a landowner of this Majorcan town of Felanitz.

The story begins when the king of Aragon married the herress of Navarre in the early 15th century. They had a son, Charles, who was titled Prince of Viana and was the rightful heir to Aragon and Navarre. But his mother died in 1441 and the king married again. A son, the famous Ferdinand who later married Isabella, was born of this union and the new queen, eager for her Ferdinand to inherit everything, managed to persuade her husband to disinherit the first son, Prince Charles of Via-

When Charles grew to manhood he rebelled against his father, aided by Aragonese factions, and by the French. He lost and was confined to a billtop castle in Felanitz in August, 1459. The ruins of this castle still stand.

Living on a large landholding outside the castle walls was a family named Colom, who had fought against the king and in support of Charles. They had a beautiful daughter, Mar. garita. The theory is that Charles, who was renowned as a ladies' man, got together almost immediately with Margarita Colom. Juan Cerda, in a closely reasoned and well-

documented pamphlet, cites a message dated Oct. 28, 1459, only 21, months after the tx. It is from Charles to the governor of Majorca roughly translated as: "We thank you very much for what you have done to help Margari-

14

BVS

Columbus in a portrait by Giovio.

ta; the truth of the thing which you guessed is now clearly demonstrated. She is pregnant," According to Cerdã, the child born of this union was Christopher Columbus. If this idea has any truth, Columbus was the nephew of the future king and queen of Spain, Ferdinand and Kebelia and Isabelia.

The Prince of Viana's message does show a certain fond concern for Margarita. He previ-ously had other children out of wedlock whom he willingly acknowledged; one daughter man-ried a count of the Medina Celi family, one of the noblest in Spain. But there is no record of his having acknowledged Christopher. Prince Charles left Felanitz presumably before the birth and died in 1461 in Aragon; the queen, his stepmother, was suspected of poisoning him.

This Felanitz theory accounts for Colum-bus' regal manner and his inordinate pride; even, by stretching a point, for his superior education, especially in navigation and cartog-raphy. It explains why he was able to marry into the nobility of Portugal long before he had made his name by discovering America. It justifies the mystery with which he shrouded his past and — a telling point — accounts for the fact that when he came to Spain 24 years later he was the guest for two years of the . Count of Medina Celi, whose wife was an ille gitimate child of the Prince of Viana. The count even considered financing Columbus' dream of sailing west.

Yet there are two boles in this marvelous. theory: The first is the question of age. If Columbus was born here in 1460 he was certainly a child prodigy, marrying at 18 and dying "of old age" at 46. This chronology can possibly be defended because people in the 15th centu-ry matured and married early, aged rapidly and died young.

But the second hole is a gaping one. The Pelanitx theory simply cannot explain away Columbus' two younger brothers, born after the Prince of Viana was dead, without besmitching the honor of Margarita Colom. No other father, in or ont of wedlock, has even been mentioned.

Each of these theories - the Genoese one, Madariaga's Sephardic one and the Felanitz one - has its persuasive points and its inexplind so Chris also known as Cristoforo Columbo, also known as Cristobal Colon, also known as Cristobal Colom, has kept his secret.

# **Insider's Outsider in the Wine Trade**

### by Jules B. Farber

MSTERDAM - In 1979 the French Ordre Mondial des Gourmets Dégustateurs presented its prize for the best wine book of the year, "Grands Bordcaux Rouges," to a Monsieur Hubert Duiker. When he began to voice his gratitude, the jury heard his accent and si-lenced him, he remembers. He was ordered to pot his acceptance speech back in his pocket as outrage prevailed on stage: The best French book about French wine had been written by a foreigner.

The man behind this authoritative volume, which has been published in Dutch, English, German and French, is Hubrecht Duijker, the Netherlands' only full-time wine write

He also has written "The Great Wines of Burgundy" — published in Dutch, French and Burgundy" — published in Dutch, French and German — and "The Good Wines of Bor-deaux" — in Dutch, with French, German and English versions in preparation. Duijker's three titles, not only practical guides to what to buy but good reading as well, have sold more than a quarter of a million copies in all their editors. their editions.

their editions. He will introduce his latest work, "The Good Wines of the Loire, Alsace, Cham-pagne," for which he tasted 2,674 wines, at the Frankfurt Book Fair, which opens Wednesday and runs through Oct. 19. Among more than 5,000 publishers from 92 countries who will sather in the matmoch feiremund hangers to ago when Duijker and his Houston-born wife, Julie, realized that they knew nothing about wine and decided to remedy the flaw. In 1969, gather in the mammoth fairground hangars to push some 300,000 titles, Duijker's "wine corner will be set up at the Spectrum (Utrecht/Antwerp) stand.

and was inspired most by the English wine writers," Duijker, now 39 years old, says. His interest in the subject began 16 years

# **Hottest Ticket in Hong Kong**

### by Harry Rolnick

ONG KONG - Hong Kong tacitly admits it has surrendered to the Sixth Asian Arts Festival, beginning Thursday with a record gathering of musicians, dancers and artists from more than a dozen countries of Asia and the Pacific, Because tickets for almost all indoor performanc-es are quickly gone, visitors are being told that the festival is primarily for Hong Kong residents. This is obviously unfair. While other coun-

tries in the region have put on the occasional all-Asia show, only this colony can spare about \$1.25 million a year to subsidize such performances and only Hong Kong can virtually give tickets away. Prices for indoor performances range from less than \$1 up to the less-than lordly \$5. For every two shows in auditoriums,

three others are held free in outdoor playgrounds Each year, the number of participating countries has grown, although the artistic mer-its of each are variable. Groups from Pakistan and Papua New Guinea - featuring "The Family Planning Play" and "The Nutrition

Play" — are new this year, but the festival in-cludes some old favorites: a Thai classical dance troupe (which will also offer Thai boxing) and the Ballet Philippines (another hy-brid, with modern choreography for a pop ballet based on the Ramayana).

Hubrecht Duijker, Dutch wine writer.

Alsace and Champagne. "First 1 read all the wine books I could find

Other countries bring more traditional dance, although with a modern patina. These include the Dance and Music Group of Bangladesh, which usually presents a little bit of gradesh, which usually presents a little bit of everything — a few years ago they inquired if they could bring jugglers and magicians, but were told that only singers and dancers would be accepted; the Sydney Dance Company of Australia; "official dance groups" from In-donesia, Malaysia and Nepal, and a group from Guangdong Opera Academy, performing nine Cantonese operas.

As usual, Japan promises interesting groups. On the one hand, the Kabuki Dance Unit will show a program of Nagauta-style Kabuki, with its elaborate accompaniment and dynamic orchestration. At the other end of the spectrum is the Yonin-no-Kai (Group of Four), which was formed in 1957 by four musicians who had just won gold medals at the World Competi"They use clear language, often tongue-in-cheek. The French and Dutch are too bombastic in their seriousness and far from reality."

Duijker was working in advertising at the time. "I wasn't a writer," he recalls, "and put my notes and pictures aside. But I was bitten by the possibilities and approached a small wine magazine. I gave them my information and ideas but refused to write until the publisher confronted me with blank pages and ordered them filled. I was forced to learn the trade.

As he grew more comfortable with his subject, he offered a wine column to Het Parool, Amsterdam's largest daily oewspaper, that be-came the first in the Netherlands. He went on to contribute to Financicel Dagblad, the national financial daily, and to the hotel trade press. "I had become a *wijnschrijver*, a wine writer," be remembers. "Until then the word and profession did not exist here."

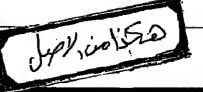

Duijker then spent three years going from publisher to publisher outlining his concept for a book on the best wines of Bordeaux. In 1974 Spectrum showed interest and a dummy taken to Frankfurt was bought by American and English publishers. Duijker went to Bordeaux to research the book in 1975. Favorable re-views in the United States, Britain, the Netherlands and Belgium led to a German edition a year later.

"But it took four years before a French pub-lisher would risk a Dutchman's book on French wine," says Duijker. "He Frenchified my name and kept my background on the book jacket very vague. Until I won the prix litteraire from that exalted jury, I was his state scoret " secret."

tion for Traditional Instruments in Moscow. Rather than continue in the "traditional" way, they have transformed the sounds of their instruments

The Hong Kong contingent consists of Chinese chamber music groups, a contemporary ballet troupe, the Chinese Orchestra, the Hong Kong Philharmonic Orchestra and a Repertor ry Theatre production taken from a popular novel. Twenty-six local groups will also be in the parks, offering acrobatics, operettas, Chiu Chow opera (perhaps the noisest in the world). children's choirs, a glove puppet expert from south China who has 200 different puppets, and an all-harmonica band playing Chinese and Western music.

The Sixth Festival of Asian Arts will be held Oct. 15-31. Forty-eight performances are sched-uled at City Hall, 16 at the Space Museum and 11 at Queen Elizabeth Stadium, with 80 shows at gueen Euzabeth Statuten, with GU snows at parks. For more information, contact Urban Council Senior Information Officer, 5th Floor, City Hall High Block, Central Hong Kong, For ticket information, telephone 5-229928 or 5-229511. # Summer, Indian Summer for the Hiker

### by Mavis Guinard

÷.,

3

1. . . . <u>.</u>

N 64

1.1

1.77

V IERRE, Switzerland - The leaves are turning to yellow and rust against the dark fir trees; the brisk red of American maples is missing, but otherwise it seems like Indian Summer here. Io the warm autumn haze. Lake Leman's silvery sheath is only skimmed by a few white sails.

It is baryest time along its banks and all along the Rhone Valley. Distant hlobs of color and the rusile of the vines reveal groups of grape pickers. Bright plastic crates along stone walls whit for the grapes and cars meet with slow-moving tractors carting great loads to the wine press. The Valaisans also use plastic pipe-lines, funiculars and even helicopters to bring the harvest down from their vertical patches.

The way to see this best is by walking. There has been a dusting of snow on the Alps peaks dazzle white - but mountain hikes are still possible during October, provided the hiker checks on conditions along the route at the local toarist office. With fair luck, this weather might hold for a few more weeks.

Halfway along the Rhone Valley, on the main roads to the St. Bernard Pass, is Sierre, a bustling little town in Switzerland's southern pocket, the gate to the Val d'Anniviers. This steep valley beckons to hikers who enjoy a workout with a view.

Although well-graded, the hairpin bends of the road to Vissoie scare off the chartered. tours rushing visitors to gape at the Mat-terhorn. Yet the Matterhorn is only one of the 4,000-meter giants sighted from vantage points along the Val d'Anniviers.

Back in 1854, the first coach road brought in the English, who chose the Alps as their playground. Vissoie - a clutch of medieval houses and a runned square tower standing sentinel over the valley - became the huh of their rambles. From a coach they continued on foot, mule or by litter to the sunbaked, cliff-hanging villages.

For centuries the Val d'Amiviers had been the reserve of Valaisan mountaineers, who hacked a road up the rocky gorges as early as the 13th century. As soon as the snows melted in May, they toiled up to the mayen pastures with their cattle and hoed potato patches and scythed the last blade of grass from the slopes before moving back to their vineyards and winter quarters along the Rhone. The timber they felled for tiny chalets and granaries on stilts, shingled church spires and a complex wooden irrigation system made harely a dent in the dense pine forests. But the seasonal shuttle wove a web of trails that can still be followed today.

With the arrival of the 19th-century tomists, the "Anniviards" turned bearer, guide or inn-

wide loads that could topple them over the precipice, the mules warily picked their way at the very edge. On their sidesaddles, the ladies must have averted their eyes and thought of England.

Today, reassuring yellow postal buses leave Sierre punctually and radiate out of Vissoie by four roads to the end villages of Chandolin, Zinal, Grimentz, Vercorin and points between. With or without a car, a visitor can reach any village at a cost of 40 Swiss francs (about \$22) for a week's worth of unlimited post bus rides.

Each resort has kept a nucleus of old chalets clustered around a church, so tightly packed that newer hotels and chalets have had to settle on the outskirts. Inclined ramps and steppingstone streets eliminate cars. Any of the lages would serve as a base for walks: up through stretches of dark pines, larch and tormented arollas to mountain lakes or meadows, to mills and waterfalls. Pine needles hush the hiker's steps; he may spot a chamois or hear a marmot whistle.

All itineraries are detailed in a local guidebook, and a map is available in every tourist office. The only caution is that in the moun-tains a hiker should never leave on an excursion without checking weather and route conditions - not only a chance snowfall but also a logging operation or a Swiss Army maneuver may block the way - and without letting someone in the resort know the hiker's destination.

The visitor might plot a leisurely week's tour around Y-shaped Vai d'Anniviers to sample its differences. Paths link the villages by a high and low route. One leads above the timberline in sight of the mountain lineup, the other wanders along the valley and into the woods.

Except for the higher-priced peak season from mid-July until mid-August, the hotels are seldom crowded during the hiking days from June to October. On a few days' notice, tourist bureaus can find the visitor a room; it will be invariably Swiss-clean with puffy down quilts. There are also hostels

For instance, in St-Luc, a visitor could pamper himself in the retro charm of the Hotel Bella Tola (bed and breakfast 30-40 Swiss francs). From here, a hiker can reach Chandolin, Europe's highest community at 2,000 me-ters, in an hour and a half. This is the guidebook estimate and a good way to gauge personal walking time.

From either St-Luc or Chandolin, paths through the forest will take the hiker up to an altitude trail that saunters above 2,000 meters in the direction of Zinal. In early summer, the pastures flower in every color, in fall, the views are spectacular. A strong hiker could push to

keeper. To heave a bundle of hay or a crino-lined lady onto a mule was all in a day's work; the mule never ooticed the difference. Used to phere is friendly, the beds spartan. For a bed and two hlankers: 14 Swiss francs. The Weisshorn is open until mid-October unless there is a cold snap. In this case, Zinal can also be reached hy forest paths passing from village to village.

> From the Weisshorn Hotel, it will take four hours to reach Zinal. After the last downhill stretch, which suddenly drops to 1,680 meters. the hiker will be glad to relax in the resolutely modern Hotel Les Erables (36-57 Swiss francs) and enjoy the luxury of a cearby pool.

> More sporty than disco, Zinal is proud of its mountain-climbing tradition. The first ascent of the Weisshorn and other firsts were planned here in the 1860s by such Alpine pioneers as Tyndall, Kennedy and Leslie Stephen. Whymper tackled the Grand Cornier shorthy before his successful but tragic conquest of the Matterhorn.

Over a wineglass of Fendant or Döle in "La Ferme" or other local carnotzets the visitor will hear of recent exploits hy the guides in the Andes or the Himalayas. From the terrace the visitor can also watch their climbing on a handy rockwall.

From Zinal, a no-prohlem itinerary will take the hiker along the Navizence River to Motec, then along the cross-country ski trail to Grimentz. A more-challenging route goes up and over the Corne de Sorebois into the barren landscape around the Moiry dam, which hacks up glacier waters for a hydroelectric plant. Nearby Grimentz is water-rich and its balconies giddy with geraniums. Both the Hotel Marenda (22-34 Swiss francs) and Pension Moiry (24-35) are close to the old village. The restaurant "Le Mélèze" offers crepes and the regional specialities: thin slivers of viande sechee and raclette cheese.

A last lap of five hours hy a well-marked alotude trail will bring the hiker to Vercorin in full view of the Bernese Alps. Vercorin is perched on a roomy ledge at 1,341 meters and likes to be compared to an eagle's nest. The Hostellerie Ortzival here (32-53 Swiss francs) offers views from both front or back rooms.

From Vercorin, a bus will take the visitor down to Sierre to his car or train. The nearest airport connection is Geneva, two and a half hours away by car.

Essential equipment for hikers includes leath-er walking boots, an extra sweater, a waterproof windbreaker and a compass. Both guidebooks and maps to excursions in Val d'Anniviers can be bought for 5 Swiss francs. Further information is available at the Sierre Tourism Office, CH-3960; tel. (027) 55.85.35, or at tourism offices in each village.

# **Tuning In to the Physics of Music**

### by Barbara Bell

ARIS — All ears will be on a cavern-ous old concert hall in Paris next week to learn whether after being ripped apart and rebuilt to meet an acoustician's demands, it has become no longer just a historie hall or a good hall but a great hall.

"I am confident. This will be a great hall," Ahraham Meizer says as workmen glue strips af wood to a concrete floor and hammer the final curved wooden panels of a new stage wall into place. By nature, he's modest and as an acoustician, he's world-class. So if Melzer says the retuned Salle Pleyel — from Wednesday the new home of the Orchestre de Paris — will sound better than good, the prediction carries veight

The Salle Pleyel was acclaimed as great, in fact, when it opened 54 years ago. After a gala inaugural concert on Oct. 18, 1927, in which both Igor Stravinsky and Maurice Ravel con-ducted their works, acoustician Gustave Lyon was praised for having found "a perfect accord etween science and art."

In sum, he was doing his job. The acoustician's challenge is to use advanced scientific knowledge and the technical tools of his day to design a hall whose proportions, air volume, materials and balanced reflective and absorpant surfaces create a musical atmosphere that can only be described by ineffable qualities such as "warmth," "clarity," "richness," "smoothness" and "hrightness."

In the building of a concert hall, the acoustician rather than the architect is king — or should be, Melzer says, adding that too often he and his colleagues are not called in until after the acoustically crucial "geometry" of a hall has been determined.

Celebrated musicians continued to perform at the Salle Pleyel over the decades but the celebrated acoustics had been considerably changed by rehuilding after fire swept the orig-inal structure a few months after the opening. Melzer says he can't begin to imagine what the hall sounded like in 1927, but that a few months ago, it suffered from a too-short reverberation time ("so sound died away too quick-ly"), a lack of definition ("a salad, in which you couldn't pick out any instruments indivi-dually") and a lack of balance. "Low frequen-cies, like those produced by a double bass, were overdominant, where high frequencies, especially the very high harmonics that actually define the quality of each instrument's sound, were absorbed by the exaggerated up-holstery of the chairs and the carpeted floors." "It was also the ugliest hall I have ever

seen," he says in passing. The solution was five months of demolition

and reconstruction ("They didn't even stop in August!" says a Frenchman who can barely imagine profaning the national vacation month) at a cost of 35 million francs (more than \$6 million) to the Credit Lyonnais, the bank that owns the hall and the building including two smaller performance halls and many dance studios - enclosing it.

"We had three requests regarding this rather large investment," says Claude Pierre-Brosso-lette, president of the Credit Lyonnais. "One, that acoustical considerations be given absolute priority. Two, that a certain amount of comfort be provided. And three, that the hall

oot be too ugly." Cavernous in shape the Salle Pleyel still is

Abraham Melzer surveys his latest acoustical project, the Salle Pleyel.

Melzer took special interest in those seats, re-placing all 2,300 old ones with seats he helped to design for improved acoustics. They have high, solid wood backs and substanoally thinner upbolstery than before. Those nearest the stage also fold down to cover the uphol-stery, forming "a wood box," to reduce even further sound absorption during recording ses-

sions. "I took nff every hit of sound-absorbing material I could from the whole hall in increase reverberation time," says Melzer, who adds that he had some arguments with people who feared the new seats would be uncomfortable. Carpets were simply torn out and thrown away, substituted by parquet floors of a very hard wood, angelique, from Guyana. The false ceiling was replaced by "acoustically transpar-ent" wooden strips that allow sound to reflect off the original parabolic-shaped ceiling above,

whose design Melzer praises as "daring." The original design of the walls won approv-al, too, along with the basic shape of the two balconies. Angled surfaces were added along the balcony fronts and in potential "dead spots" deep under the balconies to reflect ad-ditional sound to both audience and musicians; artificial amplification is never allowed

in a Melzer-designed concert hall. The hall's small stage and proscenium arch were junked and replaced by a stage practical-ly the width of the hall with a two-inch-thick solid wood shell. The whole unit, which includes sophisticated electronic controls for risers and other movable elements, was brought forward. "Now there is oo separation between stage and hall," Melzer says, "and the wood of the ceiling and stage forms a legato."

Musical terms come naturally to the 54-year-old Melzer, a Romanian-horn Israeli who holds advanced degrees in hoth physics (a master's from the Technico in Haifa) and musical theory (a master's from Rotterdam University). In combining the disciplines, he was inspired by working in Switzerland in 1957 with musician-physicist Hermann Scherchen, "Experience and feeling for music are vital

to an acoustician," Melzer says. His special knowledge of the acoustics of concert halls is much in demand. "For the past six years, I have wasted 10 percent of my time on airplanes and spent 50 percent of it abroad and only 40 percent at home in Israel," he calculates.

Most of his work has involved fixing up other people's acoustical mistakes — "making corrections," he says cheerfully. Some of his critically praised "corrections" have taken

place at the Frederic B. Mann Auditorium in Tel Aviv, the Robin Hood Dell West (an outdoor amphitheater that is summer home to the Philadelphia Orchestra) and the Centre des Congres Auditorium in Monte Carlo. For the last one, Melzer was named an Officer in the Order of St. Charles, Monaco's equivalent of the French Légion d'Honneur.

He is permanent acoustic consultant to the Los Angeles Philharmonic, the Israeli Philharmonic, the Orchestre Philharmonique de Monaco and the Orchestre de Paris. He is also head acoustician on the huilding of a concert hall in Cologne and is competing for the joh of correcting some "minor acoustical problems" in Carnegie Hall, mainly, he says, vibration and noise from subway trains running underneath the hall

In his spare time, he is doing research into old violins — for the moment, reading rare books in hotel rooms — "to find out why nobody today, not even the Japanese, can approach the sound of a Stradivarius." He wants to dedicate the research to "my old friend Isaac Stern."

Melzer's musician friends also include Zu-bin Mehta, Pinchas Zukerman, Itzbak Perlman, Carlo Maria Giulini, Yehudi Menuhin and Daniel Barenboim. Friendship with Barenboim first hrought him to Paris in 1976, when he received the conductor's appeal to try to "do something" about the vast Palais des Congrès auditorium, When the Orchestre de Paris played there, much of its sound never reached the audience.

Melzer found the acoustics so dreadful that even today, mention of them wrings from him an anguished, "Oh, no, no, please." There was simply no way to tune the convention hall for

symphonic music, he feels. "I did put in some flying saucers above the stage to reflect sound so the musicians could at least hear themselves. But the shape was all wrong. I didn't want to touch the hall," he says with a shrug.

Five years later, Melzer sits in the rebuilt Saile Pleyel as the woodwind section of the Orchestre de Paris plays the first musie to be heard there since April. At his request, it is a particularly loud, somewhat strident passage

from Mahler's Ninth Symphony. Barchooin stalks the hall, listens from one seat and another, then vaults onstage to test several musicians' seats for sound. Melzer, Mahler's score open on his lap, peers around the hall as if watching sound waves roll outward and reflect back. "Wonderful," he whispers.

# but since its retuning, it glows with light-col-ored wood (much of it elm) and hlue seats.

# In Wodehouse Land

back to his typewriter, "He disliked over-analysis of his writing," says Cazalet. "People seached for hidden depths in Jeeves' character or why he wrote about him. "The fact of the matter is,' he told me, 'I like the chap.'

The decades of success in England and the United States were shattered early in World War II. The Wodehouses, hving in France in the English Channel resort of Le Touquet, left their departure for England too late and were

His defenders called it a Bertie Wooster-like mistake by a political naif, but there was oo Jeeves to the rescue when the Germans used the broadcasts for propaganda purposes.

Continued from page 7W

In a beleaguered Britain, Wodehouse was attacked as a collaborator. Although he was ex-onerated in Parliament in 1944 by Foreign Secretary Anthony Eden, much of the tar stuck and Wodehouse never returned to his na-tive country. In 1955, he and his wife added U.S. citizenship to their British citiz Wodehouse did have his defenders during and after the war, including George Orwell, Evelyn Waugh and Malcolm Muggeridge, who jokingly pointed out that Wodehouse had ac-tually helped the war effort because the Ger-tually helped the war effort because the Germans took him so literally that when they parachuted a spy into the English countryside, he was dressed in spats, leading to his swift capture.

ment," he said at the time. "Sort of their way of saying that's that."

And now, in final amends, comes an explosion of Wodehouse books for the centennial: updated biographies by Wind and David A. Jasen: Benny Green's book on Wodehouse the lyric writer; "A Wodehouse Companion" by Usborne, even "Wodehouse on Crime." Finally, Iain Sproat says in "Wodehouse at War" that British counterintelligence reported in 1944 that Wodchouse's behavior as a prisoner had been impeccable. As part of the centennial festivities in Eng-land, BBC 2 television will offer an hourlong birthday tribute, "Thank You, P.G. Wodehouse," on Friday and Radio 4, which has already been busy presenting Wodehouse trib-ntes, plays and serialized story readings, repeats the series "Jeeves and the Feudal Spirstarting Nov. 2. at 12.25 p.m. Best of all, at least two omnibuses, Wodehouse's writing about golf and about Jeeves, will be reissued in hardback: more than 45 otles are available in paperback

caught in 1940 in the German advance. Wodehouse was rounded up with other male aliens and sent to several internment camps, then reand sent to several interment camps, then re-leased the next year just before his 60th birth-day after he made five light-hearted radio broadcasts from Berlin. (After joking about the benefits of interment — "It keeps you out of the puh and helps you to keep up with your reading" — he told his compatriots, then en-during the Battle of Britain, "Just as I am about to feel belligerent about some country, I meet a decent sort of chap. We got out together and lose any fighting thoughts or feelings.")

# Our exclusively-designed leather pocket diary is thin, flat and elegant.

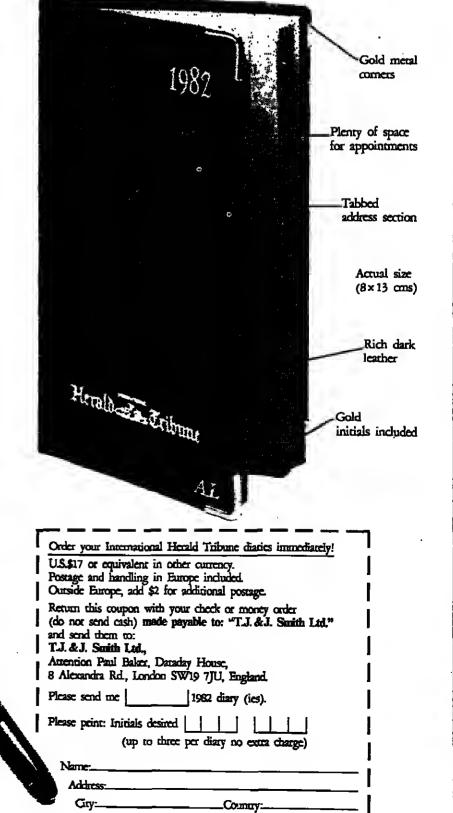

No sooner was it introduced than everybody wanted one! The International Herald Tribune diary started as a distinctive Christmas present for a few of our friends, was such a huge success that now we make it available to all our readers.

This ingeniously designed diary is flat as can be-neat and luxurious-including a built-in note pad. Slips into your pocket without a bulge and is ready with instant "jotting" paper the second you need it. Personalized with your initials (up to 3) at no extra cost. The perfect Christmas gift for almost anyone... including yourself.

- Note paper sheets are fitted on the back of the diary-a simple pull removes top sheet. - No curled up edges. No torn pages.

- Comes with note paper refills. Format: 8x13 cms. PLUS: Pages of useful information. Conversion tables of weights, measures and distances, a list of national holidays by country, airport distances, vintage chart and other facts... all in this incredibly flat little book.

Please allow three weeks for delivery.

# The art market

October 10-11, 1981 Page 10W

# A Bit of SoHo in Amsterdam

### by Rona Dobson

MSTERDAM - Going out on a A limb, an Amsterdam gallery has ar-ranged a show of young artists' work from New York by linking up with the Holly Solomon Gallery in New York's Sollo art area. Enterprise, initiative and naturally high hopes of success are all part of the venture, but so is the element of risk.

New York foments with art activity and is open to all comers, with a public keen to sam-ple oew experiences. The Netherlands is in a much more conservative phase, at least where American art is concerned: people here prefer lithos, prints and drawings by known names to original works by a new generation of un-knowns. The Dutch tend to look toward the oew German art generation in particular and to admire the density of painting and somber colors of the recent figurative swing there, stemming probably from a touch of youthful oostalgia for the old-style German expression-

Yet the work of these young Americans at the American Graffiti Gallery, 20 Berenstraat, Amsterdam, until Oct. 21 is fresh and oew and indicates a change in mood. One of the three, Michael Mogavero, paints very much in the restless, busily patterned expressionist idiom, although he is more disciplined and composed into a painterly whole than most of the dissouant canvases shown as New German Art in a recent large exhibition in Brussels. Mogavero, who has strong expressionist affinities within his clear, descriptive, figurative style, takes up where some of the 1940s American artists left off.

Io each painting, a frieze of figures or a single figure - dressed in casual outfits with their casually theatrical effect - dominates a back-ground of distant apartment blocks, city

streets, trees, mansions, a glimpse of highway. all against a restless weave of clashing pattern that creates tension and provokes curiosity.

Most of the gallery's spectators might have stepped straight out of Mogavero's canvases; most wore the same carefully offhand colorful mix of garb, scarlet boots and grubby sneak-ers, unics and T-shirts, jeans and capes, most formed the same shifting clusters in much the Yet most were Dutch, the city was Amster-dam, not New York. Few seemed to notice that Mogavero, without leaving the United States, has caught and conveyed a universal phenomenon, a sharp moment of actuality. Janis Provisor, another of the three artists

from New York, is also involved with her own time, putting an unaggressive accent on feminism in her paint-on-paper compositions. These show small female figures running or just released from wide-spun webs strung like menac-ing suns in a gaudy sky. Her colors recall tex-tile imprints that aim to catch the eye, deliber-ately assertive and brash and splashed with sparkle

In the largest work of the show, Provisor clamps scallop-sided pie molds to her painted clamps scallop-sided pre moids to her painted scene, gilding the bumble cooking utensits to garisb gold. Falling out of the painting is a timy, pink-striped clay figure hanging on the sprays of painted greenery by fingertips. Her art apes a nursery school picture book, dis-cards subliety of color or form, scores a point without ponderous pretension

Jared Bark's work is cooler and more strictly controlled, his sense of composition strong. He offers a feeling of space and light, with small gray plunging figures, like paper silhouettes spilled from a book, strewn across a color field of pale pink in one work; inserted panes of glass, shivered into neat raylike striations, combine with more silbouette ligures in others.

Provisor work with gilded pie molds.

One eccentric and imaginative work by Bark shows a burning log cabin in one corner, smoke flaring from behind it into a tall tree smoke flaring from behind it into a tall tree shape, watched from the other side by a larger-than-life head crowned by a flame-shaped cox-comb of hair. Probably a European public will find Bark's work, with its surreal overtones, more reassuringly familiar than Mogavero's observant paintings of people and sketchy ci-tyscapes or Provisor's gaudy thrust, but all three deserve to be studied with interest as signais from across the Atlantic.

# **France Prepares a Bitter Potion**

### by Souren Melikian

ARIS - Technocrats are sometimes unaware of the possible side-effects of the medicine they prescribe. If three Less sets of measures to be submitted by the French government to the National Assembly in January are approved, the French art market will be dealt a blow that will almost inevitably prove fatal.

The first of these measures is simple enough. Any payment exceeding 5,000 frances — rough-ly \$900 — will have to be made by check, not in cash. What may seem a trifling detail to those unacquainted with the art market's ways is in effect devastating. Roughly 40 percent of the payments made oow to the leading Paris auction team are in cash; oames given are oot checked and generally are not the real ones. But under the proposed law, it will no longer be possible to acquire anything without reveal-ing one's identity, which is printed oo the

But most collectors just do oot want to let others know what objects they are after - for everal reasons.

First, they are bent on withholding from dealers — and their fellow-collectors — exactly how much they may be prepared to pay for a given type of object. They believe that if they do not withhold this information, next time they covet a comparable piece, a dealer will notch his price up higher.

The yearning for secrecy is also justified by the bitter rivalries that characterize the art world. More than once this writer has seen a work of art soar sky-high at auction because two dealers or collectors who hated each other's guts were thrashing it out with bids instead of guns. A third reason may lie in the buyer's recog-

aized connoisseurship. If he is seen bidding, it will often spur others to chime in. The answer for him is to ask an unidentified friend to act on his behalf. Now this will be harder: Many intermediaries will be scared of being picked out as buyers by government spies - real or imaginary - on the lookout for concealed wealth.

Finally, dealers often do oot want it to be known that they are interested in certain categories or artists - it may be coough to start speculative huying. A second set of measures going to the Na-

tional Assembly will act as a powerful deter-rent on collectors in the upper price bracket. It will be mandatory for insurance companies to disclose to the government any insurance con-tract on goods worth more than 100,000 francs. This is to allow the government to find out who owns what — which seems to be a surprising infringement of privacy.

This measure is related to a planned wealth tax, but it seems absurd to encompass art; those who drafted the bill seem unaware that owning expensive art can be more of a liability than an asset.

As interest rates go, the owner of a 10-mil-lico-franc Van Gogh loses at least 1.5 million francs a year by merely holding on to it - on such a financial level there is no guarantee that the value of the work will increase, whereas the same amount in a bank would definitely return a high interest rate. Many owners will prefer to give up. They will oot want to face endless arguments about the actual value of their pieces with the administration — insurance values may exceed market values by as much as threeto fourfold. Rather than open their houses to experts for evaluations and be confronted with investigators, they will get rid of it all.

Private collecting oo a high level will be killed. This is not going to help the auction market — oor the dealers' market. Last hut oot least, there is the projected 30

percent tax on professional expenses. The rumor going around Paris says that the person who thought that up decided that firms were cheating on expense accounts in order to pay executives extra dividends in the form of free cars and free trips, among other perquisites.

As far as auctioneers are concerned, it does oot work out that way. Some may be blamed for not doing ecough — no proper catalogu-ing, oo advertising — hardly for spending too much. Where there have been recent improve-ments, all involved considerable additional ex-

The sale of the Le Véel collection of Japa-nese prints, so brilliantly handled by the Ader Picard Tajan group last October, led to world record prices — but only because Jean-Louis Picard and his expert Guy Portier took the trooble to go to Japan, stage a traveling exhibitioo of their prints over there and follow up by promoting a Jopanese festival in Paris timed with the October auction. This year the third sale of Le Véel prints, to be beld Nov. 6, was similarly prepared by sending out the prints to

All that is costly. To penalize those efforts by slapping a 30 percent extra tax on the expeases incurred seems intended to discourage promotion and make sure French auctioneers can't do their job. If Sotheby's and Christie's haven't thought of it yet, they should in all decency crect a statue to the man who came up with that idea.

At the time of writing, the net result is twofold. A few people are already selling be-cause they cannot bear the burden of taxation-and the thought of oncoming trouble. A least-ing dealer in 19th- and 20th-ventury paintings said that he had been able to buy several works in the last two weeks. Those who will be selling by auction will be selling poorly because the inner market will be reticent. In this case, the

good bargains will go to foreigners. It won't last, however, and the market will shrink dramatically if the projections are backed by execution of the measures envisaged io the bill. Several planned sales at the Hotel Drouot are said to have been postponed indefinitely. Private owners who wanted to part with art objects have canceled appointments with Hotel Drouot experts: Art is going underground.

A dealer to Impressionist and modern masters is building up his fall exhibition. He in-tended to include two important paiotings to be illustrated as usual in his catalogue but has be injustrated as usual in his catalogue but may just been informed by the owner that he could not have them. Museum people — none will-ing to be quoted — already complain that they will not be able to get private loans to national exhibitions. They dread massive art exports — as happened in Italy years ago. Eventually, the dealers' market will shrink in volume but oot so much as the auction mark

volume, but oot so much as the auction mar-ket. In Italy, riddled with export bans and taxes of every kind, business is booming — al-though not in the open. This trade is damaging the national heritage every day. Those in need of cash in their crumbling palaces sell — poor-ly — on the spot. The art winds up abroad.

Since it is hard to believe that any modern-minded technocrat should wish his country to go the Italian way, it can only be assumed that the ioevitable consequences have not been properly assessed. There is just about time enough (or drastic reappraisal to be made con-cerning this very special field of economic ac-tivity, where moods mean even more than they do oo the Stock Exchange.

# **Modern Thai Art Finds a Showplace**

### by John Hoskin

ANGKOK - This is oot a city to fire the imagination. Urban development in recent decades has sprawled monstrought; at every turn hopelessly con-gested traffic threatens to choke the life out of the place.

Largely because of this emphasis on the ma-terial, cootemporary art is very much neglected in Bangkok. The exquisite mural paintings in the city's many Buddhist temples are justly appreciated but the attention paid to the classical finds oo parallel in the modern. This is oot to say that there are no outstand-

ing contemporary painters in Thailand. They do exist, but through a combination of public apathy, the absence of a gallery system and consequent financial straits, they work mainly in a vacuum with little opportunity to promote their art.

Art exhibitions are not unknown in Bangkok, of course, but when they are held they often lack a central theme or a recognizable grouping of artists. This has tended not only to confuse the public but also to deter the more-

committed painters from participating. The recent opening of the Visual Dhamma gallery oo Bangkok's Soi Asoke is perhaps an indication that this period of ocelect in contemporary painting is ending. Visual Dhamma is, by European standards, a small gallery with just two narrow floors of exhibition space, but what it lacks in size it aims to make up for in the coordinated presentation of modern Thai

ært.

aping of the West in terms of themes and symbols or, at best, reactions to the ever-increasing Westernization of Bangkok. Only later, when be discovered that Thailand's leading artists kept very much to themselves out of necessity, did he find work that pursued elear, identifi-able themes that were distinctly Thai in origin. Here Pawlin saw a spiritual element that he felt was lacking in an "art world which has become highly materialistic and stagnant al-most all around the world." However, the painters concerned, despite awards and exhibi-

tions, had in been ignored except by a tiny minority of commentators. It was his aim in setting up Visual Dhamma to provide a showplace for a coordinated art with specifically Thai themes and symbols. The gallery's first exhibition, until Oct. 17, is itself entitled Visual Dhamma. (Dhamma in

Buddhist philosophy can be somewhat inade-quately translated as "truth.") The title attempts to sum up the central theme pursued by the four artists involved - Thawan Duchance, Pratuang Emcharoen, Angkam Kanlayana-pong and Pichai Nirand — who are amoog Ihailand's most prominent painters. Except for Thawan, however, they are largely unknown outside the country.

Each artist has exhibited separately in the past, but the collectivity of the exhibition is very much the key factor. The individual styles of the four painters range from the phantasmagorical animals featured in much of Thawan's work to the heavy-textured sand and paint pic-tures of Pichai to the prismatic light that distinguishes Pratuang's canvases. But there is a

dling of the surface gloss of Buddhist religious art — such as is seen in modern representa-tions of temple mural paintings — but rather as an attempt to portray and reinterpret the substance of Buddhist truth behind such symbols as the lotus flower and the Bo tree. Basic tenets of the religion - the mysteries of birth, life, death and suffering - are given a modern airing

The second factor that permits a grouping of these artists is their concern with nature and the extent to which modern man has turned his back oo it. Through such symbols as the rice grain, the plough, the peasant's hat -- images especially favored in Pratuang's paintings ---or the animals from Thawan's childhood in the oorth of the country, the canvases endeavor to draw the viewer back to an appreciation of the creation of which he is a part. As Pratuang has written, "I want people to look at these subjects not as being old-fashiooed, but rather as in the nature of the daily lives of Thais."

There is oo single label that ooe can pin oo the paintings of Thawan, Pratuang, Angkarn and Pichai although surrealistic or fantastic art would come closest (the exhibition is running concurrently with a showing of the Viennese school of Fantastic Realism). In technique and materials there is a Western influence but the comparison stops there.

Anger is apparent in many of the canvases and in the poetry that several of the artists have produced (Angkam especially is an ac-complished and published poet). It is anger against complacency and a neglect of basic values, but the bitterness of distorted shapes

**Around Galleries in London** by Max Wykes-Joyce ONDON - Two exhibitions L opening in London on Tues-day atford a splendid opportunity to compare and contrast artistic and aesthetic attitudes of the mid-

The Pre-Raphaelite Brotherbood, the members of which formed the only considerable art movement in 19th-century Eng-

ence of the original artists, among whom were William Holman Hunt, John Everett Millais and Dante Gabriel Rossetti, and the support of the most celebrated ctilie of his age, John Ruskin, permeated all painting in England in the second half of the 19th century. Primarily influenced was the work of the second generation of Pre-Rapbaelites, chief among whom was Edward Burne-Jooes, and amoog the academics them-selves, whose renewed interest in brilliant color and marked attention to natural detail stemmed almost entirely from the Pre-Raphaelite painters.

As a movement, the Pre-Ra-phaelites virtually disintegrated in less than two years. But the influ-

academicism

in Pre-Raphaelites and Academics, which Christopher Wood has mounted to coincide with the publication of his latest book ("The Pre-Raphaelites" Weidenfeld &

ing what they viewed as a sterile Brett's landscape "The Hedger." In the category of the subse-quently influenced are Anna, the elder daughter of Alma-Tadema, quite unjustly overshadowed by her parents (Lady Alma-Tadema was also an artist), with a marvelously light painting of a girl in a window seat. "At the Window," and the polished Vermeeresque "Interior with a Figure" by Leon-

ard Campbell Taylor R.A. There is also a very late mixedmedia, ocar-abstract piece by Burne-Jones, "Sunset and Corn," that could as easily have been painted by de Bouvier de Cachard, French artist who has for some time lived and worked in London. Long a successful painter of citys-capes of Italy, England, Spain, the United States, Ireland and Brazil - in all of which places he had traveled and worked extensively ----

clining nudes, landscapes, self-portraits --- and by multiple perspectives and ambiguities of vision disorientated the viewer the better to enable him or her to see with the artist's eye rather than his or her OWD.

The process begun in the 1973 show continues in his exhibition of new paintings. Taking subjects of even greater simplicity than before and paioting with a consummate skill, de Bouvier de Cachard makes of the freshly felled tree of "La Chute" a symbol of natural disin-tegratioo; the winter tree with the berd of cows beneath it is transformed by the sunset into "L'Arbre Magique": the self-portraved artist, regarding the universe through the "wrong" end of a microscope/ielescope (significantly titled, after a phrase of the Magus Hermes Trismegistus "As content, as were the Pre-Raphael-ites and their successors, to present an exterior world.

# and aesthetic attitudes of the mid-l9th century and of the present day. These are Pre-Raphaelites and Academics at the Christopher Wood Gallery, 15 Motcomb Street, Belgravia, SW.1 to Nov. 6 and Le Temps Résolu — new paintings by de Bouvier de Cac-hard, The Mall Galleries, The Mall, S.W.1 to Oct. 28.

land, had a dream: to recapture the innocence, simplicity and mo-rality of painting as they supposed it to have been before Raphael.

The gallery's director, Alfred Pawlin, is a Viennese who was first drawn to Thailand, as he says, "in search of manifestations of modern intellectual and spiritual thought. But Pawlin at first found in modern painting mostly an

# **BUSINESS NEWS BRIEFS** Expected U.S. Defense Profits Bright in Theory, Uncertain in Reality

### CSR, Mitsui Start Study on Victoria Coal Plant

SYDNEY - The first stage of the CSR-Mitsui group study on the fcasibility of building a \$1.5-billion brown coal liquefaction plant in Victoria's Latrobe Valley bas begun, CSR said Friday. It said the first

stages of the study are expected to be completed by March, 1983. CSR said that the study, whose costs are being split by CSR and Mitsui, will take about 18 months and that, if it shows that a plan using the Mitsui solvent refined coal process is workable, a full feasibility study will be carried out.

The final percentage shares for each company will be decided if the plan goes ahead. The plant under consideration would use the equivalent of 6,000 metric tons of dry coal a day, or about 15,000 tons of Victoria brown coal, which is 60 percent moisture. If the plant is built, production is expected to start between 1988 and 1990.

### Nippon Steel to Work on U.S. Steel Corp. Plant

TOKYO - Nippon Steel has signed a contract to help build a Japanese-developed continuous annealing processing plant at U.S. Steel's works in Gary, Ind., at an undisclosed cost, Nippon said Friday.

The plant is designed to perform five continuous functions — electric cleaning, annealing, coil cooling, temper rolling and inspection — to produce high-tensile steel sheets used widely in car production, the company said.

The technology was developed separately by Nippon Steel and Nip-pon Kokan. The latter has already supplied it to Bethlehem Steel and Inland Steel of the United States.

sale prices rose 0.2 percent in September, the smallest monthly in-crease in more than two years, for LONDON — General Electric and Pratt & Whitney have separately approached the Anglo-Japanese consortium of Rolls-Royce and Japan Aero Engines with proposals to join the consortium's jet engine develop-ment project for new 150-seater aircraft, industry sources said Friday. the Labor Department said Friday. Stable food prices, moderate in-

Rolls-Royce declined to comment on the report. Sources said the two U.S. aircraft engine makers made the approaches last summer. No immediate decision is expected from the consortium, they added.

The Rolls-Royce spokesman said that the consortium will hold a rou-tine board meeting Oct. 22 in Tokyo but that a decision on a new engine could be much further off.

### Britain Called Likely Site for Toshiba Factory

TOKYO — Britain is emerging as a likely site for a semiconductor and integrated circuit factory planned by Toshiba, industry sources in Tokyo said Friday.

A Toshiba spokesman said the company had ended a feasibility study for a factory in Western Europe to help avert trade friction. But he said no decision on a site has been made. tember wholesale prices were 7.8 percent higher than in September, 1980

By Thomas L. Friedman New York Times Service

NEW YORK — On paper, President Reagan's proposal to spend \$180 billion to revitalize the nation's strategic nuclear deterrent should provide a torrent of profits for thousands of military contractors and subcontractors over the next six years.

That's on paper. In the topsy-turvy reality of military contracting, a different picture emerges. Although the potential for a big windfall is there, arms industry officials and analysts caution that investors should not expect any real profit impact from the president's program until the mid-1980s at the earliest.

The slowdown was the result mainly of a 3.7-percent decline in prices for passenger cars and a 5.8 percent decrease for light trucks, representing the once-a-year "liquidation allowance" that automo-bile manufacturers give dealers as a sales incentive at the end of the model year.

Overall, consumer food prices at the wholesale level were un-changed in September, following a 0.2 percent increase in August,

Prices for processed poultry fell 8.2 percent last month following a sharp August increase, and pork prices turned down after no change in August. On the other hand, prices for beef and veal in-creased 3.3 percent in September,

following a decrease in August. Energy prices increased in Sepafter four consecutive tember

months of decline. The department said natural gas prices rose considerably more last month than in August and gasoline prices continued to fall, but at a smaller rate than in the previous four months. Heating oil prices edged down 0.1 percent in September, significantly less than previous monthly decreases.

The index for consumer goods other than foods and energy rose 0.2 percent in September, less than in August but about the same as in July.

The department said that without these liquidation allowances the index for finished goods other than food and energy would have increased by 0.9 percent.

68 issues traded on the NYSE. Volume was 50.06 million shares, up from the 47.09 million traded Thursday.

One analyst also said some investors are jittery about a possi-ble new flarcup of violence in

Egypt over the weekend. The 0.2 percent increase in Sep-tember wholesale prices reported

that there already have been some sharp declines in recent months. "I'm of the view that when it [the trend] turns, rates will fall e good deal faster," Mr. Wriston said. "When that happens, everybody

will jump on that train." Mr. Jones said a combination of slackened economic activity, a continued decline in the inflation rate and the "herd instinct" will push interest rates sharply lower. The economists' forecast said

that the U.S. economic malaise would end in the fourth quarter and that a renewed expansion of activity would begin next year. They said there was no prospect

for e recession in the near future, but they predicted that unemployment would edge up to 7.5 percent in the last quarter before declining to a flat 7 pct next year. The rate is now running at 7.3 percent.

The report predicted that the gross national product will increase by almost 4 percent be-tween the fourth quarter of this year and the last quarter of 1982. That would double the overall increase anticipated this year, it said. A 4-percent increase would follow declines in real GNP in the second and third quarters this year.

prices for its 1982 vehicles will be an average 3.4 percent higher than prices for comparable 1981 models. The increases will amount to \$250 a vehicle. In London, the U.S. dollar ended the trading week on a downward note against all major European currencies except the British pound Friday. Gold prices rose. Lower U.S. interest combined with weakening Eurodollar deposit rates combined to push the dollar down, dealers said. The pound, which has been strengthening against the dollar for two weeks, suddenly came to e halt. It closed at \$1.8960, compared with \$1.9015 Thursday. Other dollar rates in Europe Friday compared with Thursday: 2.1920 Denische marks, down from 2.2030; 1.8400 Swiss francs, down from 1.871 and 5.4950 French francs, down from 5.5437.

> 2d State Loan Planned By France This Year

PARIS - France will issue a new state loan before the end of this year, Economy and Finance Minister Jacques Delors said Friday at a news conference. He said the loan would be small, but he declined to give any further details. Last month France raised a 15billion-franc (now about \$2.6 billion), six-year, 16.75-percent bond

### Special Bank Notes

The bank even prints special notes, denominated in dollars, for amounts as small as 20 cents that it issues to Poles when they withdraw money from a dollar account for use inside Poland. These notes, called "bony," are considered as good as dollar bills.

Poles and foreign visitors spend most of their dollars or bony at a chain of special stores run by a

U.S. Will Not Be Part Of 6th Tin Agreement

WASHINGTON - The United States will not join the sixth inter-national tin agreement, the U.S. rade representative's office said Friday. The office said, however, that the United States "will continue to play an active and construc-tive role" in the fifth accord, which

expires at the end of next June. Deputy U.S. Trade Representaive Michael Smith, who led the U.S. negotiating team in Geneva, said: "We worked hard over the 4-month negotiation to structure an agreement which would meet our requirement of a balance beween consumer and producer incrests, but did not succeed."

The uniform exchange rate has been set at 35 forints, the Hungarian unit of cur-rency, to the dollar. This was the tially less expensive in Soviet-bloc trade, which is conducted largely by barter.

### **Considerable Revision**

Though much of the blueprint for Hungary's economic change was laid down in the economic policy of 1968, it has undergone considerable revision and expansion in the past two years. The move to allow private enterprise on the present scale, which sur-passes similar actions in other Communist countries, goes beyond. the 1968 proposals. At that time, . imports were expected to provide competition for Hungary's domestic industries.

But recent moves to carb imports and economic growth to improve the country's terms of trade have encouraged attempts to make competition work within the coun-try. About 12,000 small private

firms already have been licensed in-Hungary, allowing the absorption of the once-embarrassing second economy of unofficial private enterprise, in which income was not reported to the state and thus was not taxed. Indeed, private enterprise is expected to provide much of the new housing and agri-

cultural output of the nation. Unlike most other Communist countries, Hungary has looked to -its economists, for guidance. Considerable power has been transferred from government ministries to the national bank. Repayable loans have replaced subsidies, and. profitability has become a cornerone of ma

### arrives covered by a snowy napkin. A good meal of sour herring, roast venison, apple strudel and Hungarian red wine costs about small towns, are crammed with imported goods such as Scotch whisky, American cigarettes, Japanese cameras and clothes from Western 1,000 zlorys, or \$30, at the official rate of 34 zlotys to the dollar. But the maitre d' will be delight-Europe. More specialized Pewex ed if a diner just slips a \$5 bill un-

der the napkin instead. The reason is not that a dollar is now worth 320 to 360 zlotys on the flourishing black market, up al-nost 100 percent so far this year. After all, Poles generally do not want to acquire more zloty notes, which buy little in this country of

empty shops, long lines and stringent rationing. What Poles do want are dollar To Build Oil Terminal bilis. With dollars they can buy anything, from imported West

ment between the state-owned Ceylon Petroleum Corp. and Coastal Corp. of the United States to set up an oil terminal at China Bay near Tricomalee, s govern-

of course. The government also encourages retired Polish-Americans to return home in the hope of getting more of their Social Security dollars. Such people get certain tax exemp-tions and priority in housing.

ther details on cost.

AP-Dow Jones BUDAPEST - Recently announced legislation, slated to go into effect Jan. I, will allow Humgarian citizens to form private companies with as many as 30 cmployees. Five such companies also will be permitted to combine into a cooperative venture of as many as

year adopts a convertible currency for foreign trade, eliminating the 150 employees. All the new private companies will be eligible for venture capital advantage the country's exporting loans. Hungary's national bank is considering handling the loans itenterprises have had under the Sovict-bloc practice of maintaining a two-tiered exchange rate. self, or it may use another existing bank as the lender or form a new

In stimulating private enthe commercial exchange rate was terprise, the government is taking a big step toward further disman-75 percent lower than the tourist rate. But the gradual elimination of the differential has, like the entling the centrally planned economy. Major businesses are already couragement of private enterprise. forced Hungarian businesses to be more competitive both within the of ministry-designated production quotas. Profit sharing was intro-duced as early as 1957, but it has country and in international trade, Convertibility will also enhance the country's international standincreased in importance to represent a major portion of a mana-ger's total pay. Hungary plans to institute limited-liability corporachange-rate differences has not hurt West. They rose more than 5 per-cent in 1980 to almost \$4 billion. tions, which would be unique in Soviet-bloc countries. In the same period, ruble-account exports to Soviet-bloc countries

### RABBIT IS RICH By John Updike. 467 pp. \$13.95 Alfred A. Knopf, 201 East 52d St., New York 10022

### Reviewed by John Leonard

LMOST everybody in a John Up-A LMOST everybody in a John Up-dike novel runs away from death and circles back. If the obvious exceptions are George Caldwell in "The Centaur," Hakim Felix in "The Coup" and, perhaps, the minister in "A Month of Saudays" who quotes Barth and Tillich even as be couples, then the obvious exemplar is Harry "Rabbit" Angstr

hands out hammers to his critics. Yes, the style is too cich, as though he were supposed to grunt. Yes, the sex is ritu-alized and incessant, as though there were nothing else to do in Brewer after the death of God. Yes, the nove wanders, pauses, ponders, sings and picks its nose, as though we hadn't abolished the 19th century. Yes, once again he thinks too m female toes. Count the symbols; feel the impotence; watch out for the jux-tapositions and the incongruities. Well, I like his music very much Let the critics, like Nelson, "suck the foam out of one more can," their "sur-ly puzzled" faces "drinking and eating up the world, and out of spite at that." Updike on bathrooms here is as wonderful as he was on garages in "The Centaur" and on caves - re-member the severed head of Edunn - m "The Coup." Basketball and baseball are easy to write about, but who else could make golf interesting? We learn how to sell a car and sail a boat and lose a soul,

A second s

Once a decade Harry fails to es-cape; in "Rabbit Is Rich," he merely moves across town. He jogs, and be-neath his sneakers, "the dead stare upwards." They are family, friends, the famous and "whole races like the Cambodians." They cheer on this king of the ghosts":

"Maybe the dead are gods, there's certainly something kind about them, the way they give you room. What you lose as you age is witnesses, the ones who watched from early on and cared, like your own little grandstand." A middle-aged Harry — he has grown up from Peter Rabbit to the Babbitt of Sinclair Lewis — thinks of Skeeter and Jill and his own dead daughter, of Mamie Eisenhower and John Wayne and a Canadian goose that interfered with a doctor's goif game and so was clubbed to death on the fairway. Sometimes he even thinks of God with a capital G:

"Maybe God is in the universe the "Maybe God is in the universe the way salt is in the ocean, giving it a taste." And: "What I think about re-ligion is — is without a little of it, you'll sink." His son, Nelson, thinks Harry is "such a fool he really believes there is a God he is the apple of the eye of." His son is wrong. That there might not be any God is as scary to Harry as the fact of his own death. Suppose he escapes, in a machine, from the city of things, of boxes and cages and traps? He can't read a map; nature, anyway, as George Caldwell told us, is "garbage and confusion." Suppose he seeks in sex an anodyne or a substitute for the sacraments? He will find emptiness in the black cave, and waste. He wastes himself while the dead aren't looking and God is short of meanings.

### Running Out of Gas

Inconveniently, Harry is also America, going down the rabbit hole. The ume of "Rabbit Is Rich" is 1979. The place is Brewer, Pa. Skylab is falling - you will remember that in "Rabbit Redux" we were on our way to the moon — and the United States, like Harry, is running out of gas. The Iranians hold us, and Harry, hostage. On television, everything's a re-run, espe-cially the situation comedies, and at the movies everything's a sequel, ex-cept for "Breaking Away" and "Start-ing Over." No gas, no ideas, no God,

ing over. No gas, no tuess, no coo, just gravity. The action is simple enough. When he isn't selling Toyotas or speculating in gold and silver, Harry plays golf and drinks gin at the Flying Eagle Country Club. His wife, Janice, plays tennis and drinks anything. His son, Nelson, comes home from college with a defeated sulk and two young women, one of them pregnant. Nelson wheedles a job on the Toyota lot and gets married. Harry drives around looking for Ruth, whom he deserted in "Rabbit, Run" and who may be the mother of his daughter. Janice and Harry and their country club crohies fly off for a Caribbean holiday and some wife-swapping. Nelson runs away from home. Harry and Janice move to a better neighborhood. These bare bones, though, add up to the usual Updike xylophone; he

### Nostalgia

And I like Rabbit very much as well. To he sure, his search for Ruth isn't really a running away; it is more a form of nostalgia, like "antique" convertibles, and nostalgia is history written by Ears. His running days are over. Nor does he understand his own son; fathers are not permitted to. He is suspicious of intelligent women and complications rub him the wrong way. He tries to like everybody, and can't. He wants to be innocent, and isn't. But he dreams for the rest of us But he dreams for the rest of us.

According to Ruth, he is all "me, me and gimme, gimme." Theima, on the other band, finds "the way you never sit down anywhere without never sit down anywhere without making sure there's a way out" some-how "radiant"; he is her "little hairshirt," on Earth with "some kind of assignment." I believe that radi-ance. Huck Finn, after all, didn't have to grow up. Ishmael, lest we forget, came back, too. Rabbit has to com-promise. "Outward motion" can mean "inner dwindling." Freedom burts. Only in Toyota commercials do burts. Only in Toyota commercials do we rise and hang suspended; the Fly-ing Eagle sinks. After the death of God, we require a myth of communi-ty, something, as Felix put it in "Coup," that "fits the facts, as it were, backwards."

Unscramble these four Jumbles one letter to each square, to for four ordinary words.

Imprimé par P.I.O. - 1, Boulevard Ney, 75018 Paris

Answers Monday

A hard lesson and, after three "Rabbit" books, a splendid achieve-ment. Let Felix also have the last word: "I perceived that a man, in America, is a failed boy."

John Leonard is on the staff of The New York Times

### Judge in Michigan Halts Book on Turin Shroud

The Associated Press

ANN ARBOR, Mich. — A judge bas halted publication and sale of a book that he said could jeopardize a forthcoming scientific test to deter-mine if the shroud is the burial cloth of Jesus Christ

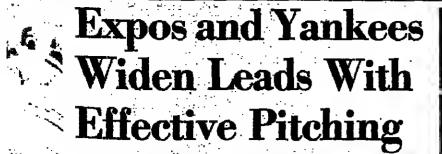

Washtenaw County Circuit Judge Ross W. Campbell on Thursday ordered Servant Publications Inc. of Ann Arbor to stop publication of "Verdict on the Shroud." A lawsuit had been filed by the Shroud of Turin Research Project, a nonprofit group of scientists and scholars.

### DENNIS THE MENACE

NAW, MUSTA BEEN SOME OTHER ONE. THIS GUY DON'T SEEM TO REMEMBER US!

New York Times Service MONTREAL - The Montreal Expos moved within one game of winning the National League'a Eastern playoff Thursday, defeat-ing the defending champion Phila-delphia Phillies, 3-1.

In the American League East, Rich Gossage saved the Yankees for the second time in a row as New York beat the Brewers, 3-0, in, Milwaukee on homers by Lou Pinicila and Reggie Jackson.

The Expos won behind the sixhit pitching of Bill Gullickson and another game-saving relief per-formance by Jeff Reardon. And when Reardon had stopped the final threat of the cold evening, the Phillies headed home in danger of being climinated, one year after they had won their first World Se-

### Wintry Evening

For the Phillies, the hour was both late and cold. They lost their second straight game on a wintry evening before 45,896 fans in Olympic Stadium, with the tem-perature slipping through the 40s while the Expos chased Dick Ruthven in four innings. The haymaker was a home run by Gary Carter that gave Gullickson a 3-0 lead.

But the dramatic high of the game was in the eighth inning with Gullickson pitching a three-hit shutout and needing only four outs to win. Then the Phillies suddenly came alive. With-two down, Lonnie Smith doubled, Pete Rose singled and Bake McBride lined a double into the right-field corner.

Now it was 3-1, men on second and third, and time for Reardon. It was four months since Reardon had been traded to the Expos by the New York Mets, and in that time he had become the stopper of the Montreal bullpen. In his last 21 appearances, he had allowed only four runs, and he got the final out Wednesday for Steve Rogers.

### Remembrance of Past

•\*\*\* 2.5 • (A The batter was Mike Schmidt, the home-run leader of the major leagues. Reardon threw a fastball that Schmidt fouled off. Then he threw two breaking pitches that Schmidt took for balls. In the R Expo dugout, Jim Fanning sud-denly had a clear vision of past en-R.A. counters with Schmidt, who has hit 16 home runs in his career against the Expos.

"When I see the sequence Fanning said later, "I see trouble. Schmidt has killed us. He did it a year ago when he hit the home run that beat us out of the division, and he's done it many other times.

Hull, reached at his anarment in White Plains before he departed for his home in Pointe Anne, Ontario, suggested that the decision had been more the Rangers' than

Hull said that the Ranger man-agement had asked him if he want-ed to remain in the area to work out in an effort to join the team later. "Their thinking was, if I bung around and kept practicing, perhaps down the road 1 could help them," he said. "Time was too valuable to hang around. I've got a lot of things to do. I haven't dug up my potatoes or turnips or picked my Brossels sprouts yet."

In his announcement, Patrick suggested, without elaboration, that Hull might find a new place in bockey, in which he earned awe, celebrity and respect for 22 years. His 100-mile-an-hour slap shot and his dashes up the ice made opponents back away and spectators roar. He was called the Golden Jet, for his hair color and speed.

In recent years, though, he lost much of the speed, and his transplanted hair was sandy, not blond.

The comeback attempt by Hull, who retired from the Hartford Whaters in the spring of 1980, had been Brooks' idea. "I wanted to see if the magic was still there," the coach said of his plan to reunite Hull with Anders Hedberg and Ull Nilsson, two forwards with whom Hull once skated for the Winnipeg Jets. The idea seemed to be working, as Hull skated well in practice

### By William N. Wallace

New York Times Service NEW YORK - Here is a preview of National Football League action this weekend, with records in parentheses. Betting lines are from Harrah's Reno-Tahoe Sports Book.

### AMERICAN CONFERENCE

New England (1-4) at Jets (1-3-1) - The Patriots are transforming themselves into a ball-control ís. team, but they will not have Sam Cunningham to run at the Jets. He is nursing a pulled hamstring. Their new punter is unheralded Ken Hartley. The Jets have available only three healthy running backs who know the offense. Bruce Harper, Tom Newton and Kevin Long. Billy Taylor, the former Gi-ant, can help with kick returns. Betting line: New England by 1 Dallas (4-1) at San Francisco (3-2) — The Cowboys always play well after being npset, as they were last week in St. Louis. The 49ers point

Oakland (2-3) at Kansas City (3-2) - The Raiders had the same record a year ago and went on to the Super Bowl championship. But they must do better by Jim Plunkett, their harassed quarterback who has been sacked 19 times al-ready, the third-highest figure in the league. The Chiefs are getting many yards from Joe Delaney, a swift but small rookie running back. Betting line: Oakland by 1.

Cleveland (2-3) at Pittsburgh (3-2) — The Browns' new kicker is Matt Bahr, who acquired a Super Bowl ring while playing for the Steelers. Browns are 0-11 at Three Rivers Stadium. Bob Kohrs, one of the younger Steelers, is starting at defensive end for the injured L.C. Greenwood and doing well. Cleveland won by a point at home last year and lost by 3 in Pittsburgh. Betting line: Pittsburgh by 4. Cincignati (3-2) at Baltimore (I-4) — The Colts' running backs,

Cartis Dickey and Randy McMillan, are fit, but the team must wait another week for Ed Simonini, the sorely missed linebacker. The defense cannot handle the good passers, and the Bengals' Ken An-derson certainly qualifies as one. The Oilers' Earl Campbell left a lot of braises on the Cincinnati defense last Sunday. Betting line: Baltimore by 2.

Seattle (1-4) at Houston (3-2) They have met in each of the last two seasons, and the Seahawks won both times. But since that last victory, Seattle has lost 14 of 16 games, and this time it will be missing two regular defensive backs, Dave Brown and Ken Easley. The Oilers are going to ride with Campbell again. He had 182 yards on 37 carries last Sunday. "Like tackling a beer truck," said Cincinnati's Tom Dinkel. Betting

line: Houston by 7. Invin, LA

### NATIONAL CONFERENCE

St. Louis (2-3) at Giants (2-3) -Tullis, Hou Ronches, Hou Versor, Cin Neims, Wos Poyton, Min The Cardinals' fine ranning back Ottis Anderson has yet to gain 100 yards this season. But the Giants

are favorites of his; he has had 100 or more in three of four games bled by persistent leg cramps. The Eagles can coast until they play the Cowboys Nov. 1. Betting line: Philadelphia by 9. Tampa Bay (3-2) at Green Bay (2-3) — The Packers for years have had one of the better tight ends in Bard Coffman who will be an against them, 168 the last time. A new running back. Rob Carpenter, can help the Giants, but he is not

going to turn that ineffective of-Los Angeles (3-2) at Atlanta (3-Paul Coffman, who will be an open pass target now that defenses 2) - The Rams have won three straight, and Pat Haden was an double up on James Lofton and impressive passer in the last victo-John Jefferson, the all-pro wide ry, over Cleveland. They hope Wendell Tyler can play (his status receivers. Coffman caught six passes against the Giants. The Buccancers' quarterback, Doug Wilquestionable) because the coaches suspect he can run inside liams, is having his best season, according to his coach, John McKay, against the Falcons' 3-4 defense but his completion percentage re-mains less than .500. Betting line: with the linebackers playing so deep. Atlanta may regain three regulars who have been missing. Green Bay by 3.

Page 15

Washington (0-5) at Chicago (1-4) -- The Redskins have some unbelievable statistics: second in the league in yards gained passing and second in fewest yards allowed. But they have the most turnovers -21 - 15 more than their oppo-nents. The Bears' Walter Payton has taken a pounding. "He has contusions from head to toe," said Coach Neill Armstrong. Betting

MONDAY NIGHT Miami (4-0-1) at Buffalo (3-2) -The Bills last season beat the Dolphins for the first time in 11 years, but they lost the second game, at Miami, Their well-balanced of-fense can give the Dolphins trou-ble, with the wide receiver, Jerry Butler, the key player. David Woodley did not go unscathed when tackled by the Jets' Joe Klecko and Mark Gastinean. His condition is questionable, but Don Strock is a formidable quarterback replacement. Betting line: Buffalo by 4.

### Danielson on Injured List

United Press Intern PONTIAC, Mich. - Quarter back Gary Danielson of the De-troit Lions has been placed on the injured reserved list, assuring that he will be out of action for at least a month. Danielson suffered a dislocated wrist on Sept. 27 in the Lions' 16-0 victory over the Oakland Raiders.

**Bobby Hull** 

Hull scored one goal in five games, but he complained that, af-ter a year and a half off the ice, he was having trouble with his timing. the eye-hand coordination that is needed to send and receive passes quickly and to shoot accurately.

On ice, Hull was an adequate but no longer dominating player, trying to make a team that is bent on improving this season and contending for the Stanley Cup, which the Rangers have not won since

Carol Vadnais, starting his seventh season as a Ranger and his 17th in the league, said that Hull seemed disappointed but not de-pressed Wednesday night when he told Ranger players at a restaurant in Rye, N.Y., that he was leaving.

## **Unser Criticizes Auto Club for 'Unjust' Fine**

United Press Internetiona CHAMA, N.M. - Bobby Unser is continuing his war with the U.S. Auto Club, despite that body's ac-tion to reinstate him as champion in the 1981 Indianapolis 500.

Though thrilled to regain the Indy grown, his third, Unser angri-ly criticized the accompanying de-cision Thursday to fine him \$40,000 for passing cars under a yellow caution flag. It was that ac-tion that caused indy stewards to penalize Unser a lap and strip him of the title. The championship was then awarded to Mario Andretti,

### Rogers, Crenshaw Among Last 4 in Match Play Golf

VIRGINIA WATER, England - Bill Rogers and Ben Crea both Texans, held on through high winds and a thunderstorm Friday to reach the semifinals of the World Match Play Golf Championship.

Rogers overcame Gary Player of South Africa, 2 and I. Player, 47 next month, trailed by five holes with seven to play but won the. 20th with a spectacular eagle and went on to cui Rogers' lead to two

boles before going under. Crenshaw, after leading all day, defeated David Graham of Australia, 4 and 2.

Rogers and Crenshaw, long time buddles from their college days at the University of Texas, meet each

other in Saturday's semfinals. Severiano Baliesteros of Spain won the quickest victory of the day - an S and 6 triumph over Greg Norman of Australia, And Bernard Langer of West Germany de-feated Brian Barnes of Britam at the third extra hole.

### Sullivan, Burns, Johnson Share Lead on PGA Tour

United Press International COLUMBUS, Ga. - Mike Sullivan firod a 4-under-par 66 Thurs-day to pull into a three-way tie for the lead with George Burns and George Johnson after the first round of the Southern Open golftournament.

Sullivan, whose only victory on the PGA Tour was carned here last year, had a round that included four birdset and 14 pars. Five play-ers are a stroke behind the leaders.

### Cincinnati to Hold

Davis Cup Final

NEW YORK - The United States and Argentina will play the final round of the 1982 Davis Cup at Riverfront Coliscum in Cincin-nati, Dec. 11-13, the U.S. Tennis Association announced.

It will be the first time a Davis Cup final has been played in Cincinnati, although an early-round match against Japan was held there in 1952.

Led by John McEnroe, the United States advanced to the final by beating Mexico, Czechoslovakia and Australia. Argentina, led by José Luis Clerc and Guillermo Vilas, beat Britain earlier this month to reach the final.

Fighting the Costly Skies of Europe

### **Art Buchwald**

# Intelligence Assessment

WASHINGTON — Pity the poor KGB spy who has just been recalled to Moscow from the United States to explain his recent reports on President Reagan's military decisions.

a series and series and series and

Federov, up until recently your work in the United States has been impeccable. But lately we can't make head or tail

out of anything that you bave sent us." "Is confusing, comrades, 1 con-

Page 16

fess. But is not my fault. I nnly report the truth." 3 Let's start with this report. What is Window

of Vulnerabili- Buchwald "Is window president looks out

of from White House and sees missile gap with Soviet Union. He said ou television he wants to close win-

"That leads us to this second microfilmed report. Yon said be would close the window by building an underground MX missile system in state of Nevada, and move live missiles around so we wouldn't know where they were."

"Is not my fault I sent that mesformed it in The New York

"Then you sent us a third coded cable that president had decided not to build new MX system, but to put MX missiles in old Titan holes and add more cement.

Comrades, I know sounds crazy, but I only reported what the president said."

### Italy Plans New Steps To Save 'Last Supper'

The Associated Press ROME - The Italian government is planning new steps to save Leonardo da Vinci's masterpiece

"The Last Supper," according to a government official. The 483-year-old fresco in Milan is suffering from a variety of ills. Cracks have opened in the refecto-ry wall of Santa Maria delle Grazie, where it is painted, and a fungus is devouring its colors.

Sen. Pietro Mezzapesa, undersecretary for cultural works, told a Senate committee that the government will shore up the wall, attempt to preserve the colors and control the climate in the church,

"Furthermore you told us that the president is going ahead with building the B-I bomber, which will be obsolete by the time it flies. The cost is \$180 billion."

"I have the tape where he announced it on television." "All right, Federov, assuming the president said it, where is he

going to get the \$180 billion and still balance the budget by 1984?"

"Is simple, comrades. Is called supply-side economics. You cut federal spending, give everyone 25 percent tax cut, and the less taxes people pay, the more money you get back from the working people. Look, is all here on Laffer curve."

"Is not funny, Federov. And nobody in Soviet Union believes it." \* \* \*

"Comrades, I am aware on paper it makes no sense, but our mole in the Treasury says Reagan people are serious about it."

Shall we continue? You left message in Rock Creek Park for Boris, which said, 'Half of U.S. Army and Navy were 'stoned.' What is stoned?"

"Drugged. They go on trip by smoking cigarettes and taking pills." "You want us to believe U.S. military chiefs would let stoned

people near nuclear weapons and billion-dollar military ships and planes? 'Is all in Congressional Report, comrades. I left out those who

were drunk because I knew you wouldn't believe me." "And now, final message which you sent in diplomatic pouch Monday. You say U.S. is now pre-paring for limited nuclear war, on assumtion if they keep it small, we will do same thing. "What kind of idiots do you

think we are, Federov? You made this all up, or else you're being fed by CIA disinformation agents. \* \* \*

"Federov, you need a rest. It's time you came in from the cold. Perhaps six months in a nice sanitarium will do you a lot of good." "No, please, comrades. I'm not insane. I just reported the facts." "Go quietly, Federov. Here is a resent from all of us in the KGB's North American section." "What is it?" "A pad and crayon. Just think.

You will now have time to draw all. the Laffer curves you want to." © 1981, Los Angeles Times Syndicate

### Taking Aim at IATA

ting a bargain from the airlines. "If I could stay in Brussels Sat-urday night I could have the tick-Article 85 forbids restriction of competition within the Common Market countries. Lord Bethell's et at half price," Lord Bethell said. The week before, Lord argument is that the national airlines fix fares and that their gov-Bethell, who is a member of the ernments rubber-stamp the deci-sions. The agency through which European Parliament, had flown from London to Strasbourg. "I the fixing is done, he says, is IATA, the International Air paid almost as much as for a ticket to Washington," he said. Transport Association,

Even if operating costs are higher than in the United States, European air fares are stagger-ingly expensive. Lord Bethell is "If my action succeeds," he said, "IATA will be more or less out of business." Speaking by telephone from IATA headquarters in Geneva, spokesman David Kyd suggested that Lord Bethell was simply oue of the few people trying to do something about it. He has started a campaign called Free-dom of the Skies to break down choosing IATA as a visible target what he calls the air-fares cartel and he has brought the EEC and stated that the attempt to reduce air fares was a political move by the British government Commission before the Europe-an Court in Luxembourg for fail-ing to enforce Articles 85 and 86 which its European partners are unlikely to accept. Kyd denied Lord Bethell's

of the Treaty of Rome. The struggle for cheaper air fares within Europe was backed charges of price-fixing and nib-ber-stamping and stated that his fare comparisons are misleading. by the British government Thurs-day when Trade Secretary Juhn For the present IATA argues that the treaty excludes air travel Biffen urged the European Combecause it makes no specific

mention of it. Lord Bethell had a small victory last July when the European Commission stated, in response to his appeal, that an inquiry would be held to see whether European governments were breaking the law by simply rubber-stamping air tariffs fixed by the airlines. The commission has di-rected Common Market governments and airlines to reveal details of price-fixing procedures by next Friday or face a fine. Arguing that the Commission's

action was too little and too late. Lord Bethell proceeded with his court case. If the European court rules in his favor, be said, "the present system of price-fixing will be illegal, various national legislation will be illegal under European law, and the Commission will have to enforce the decison because European law takes precedence over national law."

POSITIONS AVAILABLE

MARKETING MANAGER

All Europe

The facting U.S. firm in the field of opplarance sciences & color resource-ment is seeing on accomplished Techni-col Soles Executive to nanoge of Euro-pean motaling operations involving saling, castoner service & education, &

The problem right now is fi-nancing the court case. "Special-ists in Community law don't come cheap," Lord Bethell said. He is trying to raise £25,000. On a London-Brussels flight

last summer, which was happily covered by The Times of Lon-don, Lord Bethell won statements of approval from fellow passengers Gaston Thorn, president of the EEC Commission ("Fares in Europe are certainly too high"), and from Joseph Lons, secretary-general of NATO

"The Brussels fare is very expensive"). But in general he has had little active Enropean support on this very European problem. "I've seldom come across people who disagree with what I do, but there's a gap between agree-ing intellectually and giving them

"Other parliamentarians say "Other parliamentarians say we would like to join you but our governments wouldn't like it. Many of them have trade union backing, which is a conservative influence, and more than a handful are consultants to the airline industry — Lufthansa, Air France, etc. And a few, I sup-pose, would be suspicious of

what I am trying to achieve be-cause they would detect in it a sinister British plot to corner the airline market, in which we have a good start. To which I say cither we have a Common Market or we don't." Lord Bethell, who was talking

in his London home, estimates that he has spent £45,000 on air fares in his five years as a Euro MP, sometimes paying three times as much for a ticket as the person next to him. Lord Bethell argues that if Eu-

ropean airlines were obliged to compete as American airlines do, the consumer would benefit. At present according to his figures from last April, London-Rome costs more than three times as much as Dallas-Tampa, roughly the same distance, and on some routes it is cheaper for an American businessman to fly to a European capital than it is for his European competitor.

"It is cheaper right now," Lord Bethell said, "to fly from London to New York, or even Hong Kong, than from London to Stockholm." According to Lord Bethell, the Beigian national airline, Sabena, nses its high-priced London-Brussels fare to subsidize flights to Zaire, the former Belgian Congo, while Air France is notoriously self-protective at a high cost to French consumers.

"The French haven't woken up to the fact that they're being taken for a ride, in more ways than one," he said. In a statement last month, French Transport Minister Charles Fiterman said, "France is very attached to the existing system of multi-company agreements. The British have been most

susceptible to Lord Bethell's arguments, partly because they are geographically more dependent on airplanes than many Europeans. It takes 21/2 hours by TEE train from Paris to Brussels, more than 10 hours by surface transport from London). Also thanks to Britain's handful of independent airlines, the British have seen that fares can indeed be dramatically reduced.

### Admiration for Laker

Lord Bethell says be admires Sir Freddie Laker, who is also attempting a court action to reduce fares: "I think what he did on the transatlantic route is fantastic. He opened up America to the British and Britain to Americans in a way that is revolutionary. I'd like to see the same easy travel to the countries of Europe." Another beef he has against

IATA is that lack of competition enables the airlines to ignore the customer's comfort. Lord Bethell, who stands 6 feet 2 and weighs 200 pounds, is especially irritated by IATA regulations ou

seat pitch. "What's so iniquitous about IATA is that most trade organizations are there to police the enterprises and to lay down minimum standards from the consumer's point of view, but IATA lays down maximum standards. It says you must not have more than 34 inches between your seat and the seat in front. In other words, it's an anti-consumer or-

Lord Bethell hopes the Euro-pean court will hear his case early next year, "It's true that it's a bit of a David and Goliath war,' he said. "But I am naive enough to think justice will prevail."

# PEOPLE: Carter Plans to Sue Post Over Eavesdrop Charge

Former President Jimmy Carter and his wife Rosalym plan to suc The Washington Post for libel over a gossip column item charging that they had eavesdropped on some of Nancy Reagan's conversations during ber pre-inaugural residence at Blair House, a lawyer for the Carters said. The Carters, through

their Washington attorney, Ter-rence B. Adamson, demanded a re-traction and a public apology, saying in a letter to Post executives that the report was "false, defamatory and libelous per se." Regard-less of how The Post responds. Adamson added, the former president's "intention is to sue." Benjamin C. Bradlee, the newspaper's min C. Draate, the newspaper's executive editor, said The Post stands behind the story, which was published in its "Ear" column on Monday. Diana McLellan, who writes the "Ear," which previously was carried in The Wasington Star before its closing, said of the Carters, "They know perfectly well it is true." Jody Powell, who was Carter's White House press secretary, said the former president feels that the article was not only "irresponsible and scurrilous," but was damaging to the government by "implying that the Blair House, the official residence for visiting foreign leaders, is bugged by the U.S. government." Bradlee, in a telephone interview, said "there is not a doubt in the world that the item, as written, doesn't say anvthing about anybody bugging any-body." As for the demand for a public apology. Bradlee said, "How do you make a public apology — run up and down Pennsylva-nia Avenue barebottom shouting 'Tm sorry'?" Isabel Lanza, chosen as a Pent-

off early Friday from Costa Mena. Calif., in a 10-story-high heima-filled balloon dubbed "Superchick-en III" for what-they hoped would : house Pet thought she could get \$17 million from the magazine for "commercial exploitation" of her. Instead, the 29-year-old Italian model was fined \$67,767 for "malien ill' for what they hoped would : be a 50-hour flight to the flight Coast John Shoecraft, 37, and Fred Gorrell, 40, lifted off from Orange Coast College with two chase planes nearby to monitor the ciously" refusing the magazine's award for being chosen Pet of the Year in 1980. Lanza sued Penthouse after she renounced planned coast-to-coast journey. They expected to be carried by the \$300,000 in prizes before more than 1,400 persons at a gala Linintervention and a southerly route across the country, "We don't care where we land as long as its on the East Const," said Lori Edris, opercoln Center award dinner in Sep-tember, 1980. She said Penthouse officials failed to tell her she had been chosen Pet of the Year and ations director for the flight. The that she was tricked into coming to balloon is expected to travel at al-titudes between 17,000 and 30,000 the dinner, Lanza charged that the magazine was guilty of invasion of privacy, fraud and commercial exfeet and at speeds of about 70 ploitation. She also said never miles an bour. This will be Shoeagreed to the "primeval idea that I craft's third attempt to cross the was to be a Penthouse slave girl." country in a belium-filled balloon. Justice Richard Wallach of state Both previous flights ended before Supreme Court in Manhattan conthe craft reached the East Coast.

A day after a warrant was issued for his arrest. British rock star

Gary Numan appeared in court in London and was charged with pos-sessing an offensive weapon -3baseball bat. A warrant for the 23year-old millionaire was issued af-ter he failed to show up in Uz. bridge court in northwest London. His lawyer, Mark Cran, said Numan did not keep the original court date because his lawyers had requested a delay in the case and they thought "it was not accessary for him to appear." Numan was charged in connection with an al-leged offense with a baseball bat July 26 at London's Heathrow Airport. No details on the case were given. Judge Lavina Cax released Nuran unconditionally until Dec. 21 but warned him to appear then or face a heavy penalty. Numan's or face a heavy penalty. Numan's case was delayed in August be-cause he was piloting his private Cessna airplane on an around-the-world trip. He flew home to Bris-ain aboard an airliner Sept. 29, saying Indian soldiers had de-tained him and co-pilot Babby Thomson at gunpoint the previous week when they made an emergen-cy landing on the Bay of Bengal cust. The plane is still impounded in India. in India.
